

JOINT INTEROPERABILITY ENGINEERING ORGANIZATION

Database Specification DS 1-96

17 December 1996

DATABASE SPECIFICATION
FOR THE
STATUS OF RESOURCES AND TRAINING SYSTEM (SORTS)

SUBMITTED BY:

APPROVED BY:

DAVID W. HALL
Chief, SORTS Engineering

SAMUEL D. PUCCIARELLI
Deputy Commander
Center for Applications
Engineering

Requests for this document must be referred to:

THE COMMANDER JIEO
ATTN CODE JEKEA
DEFENSE INFORMATION SYSTEMS AGENCY

FALLS CHURCH, VA 22041

ACKNOWLEDGMENT

This Database Specification was prepared under the direction of Chief, SORTS Engineering Division (JEKEA); Chief, Joint C2 Applications Department (JEKE); and Chief, Center for Applications Engineering (JEK). Technical support was provided by Aaron B. Floyd Enterprises, Incorporated under Contract Number DCA100-92-C-0155.

ABSTRACT	xi
1. SCOPE	1-1
1.1 Identification	1-1
1.2 System Overview	1-1
1.3 Document Overview	1-2
2. APPLICABLE DOCUMENTS	2-1
2.1 Government Documents	2-1
2.1.1 Specifications	2-1
2.1.2 Standards	2-1
2.1.3 Other Publications	2-1
2.2 Non-Government Documents	2-2
2.2.1 Specifications	2-2
2.2.2 Standards	2-2
2.2.3 Other Publications	2-2
3. DATABASE IDENTIFICATION AND DESCRIPTION	3-1
3.1 Database Organization	3-1
3.2 Labeling Conventions	3-1
3.3 Database Reporting Procedures	3-1
3.3.1 Reporting Format	3-1
3.3.2 Reporting Frequency	3-1
3.4 Interfaces	3-2
3.5 Security	3-2
4. DATABASE DESIGN	4-1
4.1 Technical Approach	4-1
4.1.1 Database Normalization	4-2
4.1.2 Database Indexes	4-2
4.1.3 Physical Design Considerations	4-2
4.2 SORTS Data Model	4-2
4.3 SORTS Database Design	4-6
4.3.1 SORTS Tables	4-6
4.3.1.1 SORTS Joint Tables	4-7
4.3.1.1.1 Basic Identity Information Table	4-7
4.3.1.1.2 Reporting Organization Table	4-8
4.3.1.1.3 Organization Location Table	4-8
4.3.1.1.4 Embarked UIC's Table	4-8
4.3.1.1.5 Navy Location Table	4-9
4.3.1.1.6 Reserve Information Table	4-10

4-147	Temporary Table (TEMP)	4-94

ABSTRACT

This Database Specification describes the logical design of the Status of Resources and Training System (SORTS) relational database. The Database Specification identifies database tables and views. A complete data dictionary of SORTS data elements is also provided.

This document supersedes JIEO, DS 1-96, Database Specification for the Status of Resources and Training System (SORTS), dated 1 April 1996 (unpublished).

SECTION 1. SCOPE

This section provides an overview of the Status of Resources and Training System (SORTS) project and Database Specification document.

1.1 Identification

Identification Number: DS 1-96

Title: Status of Resources and Training System (SORTS)
Database Specification (DS)

Abbreviation: SORTS DS

1.2 System Overview

The Status of Resources and Training System (SORTS) is an information management system within the Department of Defense. SORTS provides the National Command Authorities (NCA) and the Joint Staff with authoritative identification, location, and resource information on units of the U.S. Armed Forces. It is the current system providing unit monitoring information to the National Military Command System (NMCS). SORTS supports the Joint Staff and the unified and specified commands to satisfy information needs for command and control of U.S. military units in all operational environments.

SORTS provides a highly flexible system architecture that allows for fast, effective data updates but minimizes contentions for system resources. Within this architecture individual software components are distributed among various hardware platforms. This distribution removed resource bottlenecks and inflexible designs found in the present system. All hardware and software components are integrated into a single operational environment.

In addition, powerful and effective software applications are provided allowing ease of data entry while providing complete and accurate validation capabilities. The end result is a more responsive system which enhances the utility of the data contained within the SORTS database.

A Relational Database Management System (RDBMS) is the nucleus of SORTS. The RDBMS provides an efficient mechanism to control, retrieve, display, and update SORTS data.

SORTS was brought under the MIL-STD-498 software development cycle. The requirements specified in the functional description

were incorporated into the SORTS Modernization Preliminary System Specification.

The preliminary system specification, including system architecture and requirements, was briefed to the SORTS community at the SORTS Modernization System Requirements Review (SRR) conducted on 18 April 1989.

To facilitate the requirements validation process, a site survey was developed and distributed to the SORTS community. Site visits were conducted between July and November of 1989. Following these visits, a Site Survey Technical Report was produced and distributed to the SORTS community for review. This report detailed the findings of the requirements validation process. In addition, a proof-of-concept model demonstrating a relational database model and some additional system components was developed.

In March, 1990, the Site Survey findings and the Proof-of-Concept Model were presented to the SORTS community at a SORTS Conference in New Orleans. The SORTS community concurred that SORTS, as described in the Preliminary System Specification and Site Survey Technical Report, adequately reflected the needs of the community.

The System Specification was finalized to reflect the changes to the requirements as determined by the Site Survey and the SORTS Conference. This was briefed to the SORTS community at the System Design Review (SDR) conducted on 18 May 1990.

1.3 Document Overview

This Database Specification for SORTS contains the following:

- a. A detailed description of database design, interfaces, and labeling conventions
- b. A detailed description of data elements, attributes, and definitions
- c. A listing of Structured Query Language (SQL) statements for database table creation.

SECTION 2. APPLICABLE DOCUMENTS

2.1 Government Documents

The following documents of the exact issue shown form a part of this specification to the extent specified herein. Copies of specifications, standards, drawings, and publications required by suppliers in connection with specified procurement functions should be obtained from the contracting agency or as directed by the contracting officer.

2.1.1 Specifications.

- a. JDSSC, SPM SS 179-90, Status of Resources and Training System (SORTS) Modernization System Specification, 18 June 1990.
- b. JDSSC, SSDD 1-91, Status of Resources and Training System (SORTS) Modernization System Design Document, 12 November 1991.

2.1.2 Standards.

- a. MIL-STD-498, Military Standard, Software Development and Documentation, 5 December 1994.
- b. JDSSC, PM 1-91, Documentation Standards and Publications Style Manual, 1 June 1991.
- c. MIL-STD-6040, Military Standard, U.S. Message Text Formatting Program Of U. S. Message Text Formatting Program, 1 January 1997

2.1.3 Other Publications.

- a. FIPS Pub 127, Database Language SQL, 1 March 1987.
- b. USMC, MCO P3000.13B, Standard Operating Procedures for Status of Resources and Training System (SORTS), 24 April 1989.
- c. USAF, AFI 10-201, Status of Resources and Training System, 1 October 1995.
- d. USN, NWP 10-1-11, Status of Resources and Training System (SORTS), Revision A, February 1989.
- e. USA, AR 220-1, Unit Status Report, 31 July 1993.

- f. CJCS MOP 11, Status of Resources and Training System (SORTS), 24 December 1992.
- g. CJCS MOP 39, Release Procedures for JCS Papers and Information, 6 August 1990.
- h. CJCSM 6120.05, Manual For Tactical Command and Control Planning Guidance for Joint Operations, Joint Interface Operational Procedures For Message Text Formats, 1 January 1997.
- I. CJCSI 3401.01A, The Chairman's Readiness System, 15 October 1996.
- j. Joint Pub 1-03.3, Joint Reporting Structure (JRS), Status of Resources and Training System (SORTS), 10 August 1993.
- k. Joint Pub 1-03.29, Type Unit Characteristics Report (TUCHAREP), 1 January 00.
- l. Joint Pub 1-03.19, Chapter 1, Standard Specified Geographic Location File Report (GEOFILE), 1 October 1976.
- m. Joint Pub 1-03.19, Chapter 2, Major Equipment Identification Code Report (MEREP), 1 October 1976.
- m. JDSSC, FD, Status of Resources and Training System (SORTS), Modernization, 15 May 1988, (Draft).

2.2 Non-Government Documents

The following documents of the exact issue shown form a part of this specification to the extent specified herein. In the event of conflict between the documents referenced herein and the contents of this specification, the contents of this specification will be considered a superseding requirement.

Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal Agencies.

2.2.1 Specifications. IEEE P1003.1, Portable Operating System Definition (POSIX), Draft 12, 1987.

2.2.2 Standards. ISO Standard 7498, Information Processing Systems - Open Systems Interconnections - Basic Reference Model, 15 October 1984.

2.2.3 Other Publications.

- a. Cronin, Daniel, Mastering ORACLE, Carmel, Hayden Books, 1989.
- b. Date, C. J., An Introduction to Database Systems, Volume I, Reading, Addison-Wesley, 1986.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 3. DATABASE IDENTIFICATION AND DESCRIPTION

This section describes the basic concepts of SORTS database organization, labeling conventions, reporting procedures, external interfaces, and security.

3.1 Database Organization

The SORTS database is formulated based on the concepts of a Relational Database Management System (RDBMS). Data is stored in a two-dimensional structure of rows and columns. These rows and columns are organized as tables of related data elements. Each table contains a key that uniquely identifies a row within a table. Key values provide relationships between tables.

Section 4 of this document provides detailed descriptions of all SORTS tables and attributes.

3.2 Labeling Conventions

SORTS data element labeling and naming conventions are consistent with the standard data elements defined in Joint Pub 1-03.3 and Joint Pub 6-04 series. The table labeling and naming conventions follow the set/segment names of the SORTSREP and associated services messages defined in Joint Pub 6-04 series documents. Where more than one set makes up a segment, the corresponding database table takes the name of the first set of the segment.

3.3 Database Reporting Procedures

The following paragraphs describe the format and frequency of the SORTS reports used to update the database.

3.3.1 Reporting Format. The official reporting format for the SORTS database is the United States Message Text Formatting (USMTF). The update and distribution will be based solely on USMTF. USMTF consists of data sets delimited by slashes and terminated by double-slash characters. These sets are positional and order-dependent and can continue on multiple lines. USMTF restricts each line to a maximum of 69 characters. USMTF allows for data field labels and set comments to aid in visual review. An order dependency exists between sets in USMTF. Sets are organized in groups where certain sets must follow other sets in the group. This group of sets defines a database transaction.

3.3.2 Reporting Frequency. Currently Joint Pub 1.03-3 reporting procedures specify that SORTS data should be reported as changes occur and less frequently than once a month. Generally, most reporting data is received once a month with all reports coming

in during the same period. Certain information such as Navy positional information is reported several times a day.

3.4 Interfaces

Many systems in the GCCS community need access to the data stored in the SORTS portion of the GCCS database, henceforth referred to as the SORTS database. The SORTS community can access the SORTS database using a variety of Oracle products, to include but not limited to SQLPLUS, Oracle Forms, and Oracle ReportWriter. Queries and reports have been developed in SQLPLUS and Oracle Forms.

SORTS provides external General Interactive Query System software consisting of one generic interface that generates SQL statements for accessing the SORTS database.

3.5 Security

The CJCS MOP 11 contains security guidelines for SORTS data that were adhered to within SORTS. These guidelines define the minimum classification of SORTS data aggregates.

Steps must be taken to protect SECRET data that may be maintained in the SORTS database. Hardware not located in shielded vaults will require shielding, and network interfaces may require cryptographic equipment.

The highest classification of data allowable in the SORTS database will be SECRET. The Database Administrator (DBA) will control the security features for the SORTS database. The DBA will enroll users, assign privileges to SORTS users, and control data access to selected SORTS database information. The report originator will be responsible for specifying the classification of reported data.

SORTS also maintains audit trails containing information about data passing between different processes.

SECTION 4. DATABASE DESIGN

This section describes the overall design of the SORTS database.

4.1 Technical Approach

Designing a relational database involves several processes, including:

- a. Defining entities. An entity is a major category of data that will be monitored, tracked, or manipulated. Entities are translated into tables later in the design process.
- b. Defining entity relationships. Entity relationships determine how one entity affects another. Entity relationships are important in determining primary and foreign keys.
- c. Defining attributes. Attributes describe the specific characteristics of an individual entity or relationship among entities. An attribute or group of attributes that uniquely identifies a row of an entity is called a "key" attribute. The purpose of key attributes is to efficiently locate specific rows in a database table. Database table definitions directly descend from the entities and attributes defined.

The SORTS database design effort began by analyzing SORTS existing capabilities and database layout. This analysis provided a starting point for the database model.

This model provides representation of the SORTS database; it consists of major data entities, relationships between entities, and data attributes. Tables are defined using the entities and attributes defined. Entities in the developed model, which is described in detail in section 4.2, correspond to the record definitions used in the current SORTS database.

A grasp of several important database concepts such as normalization/denormalization, indexing, and physical design considerations is necessary to fully understand the overall SORTS database design. They are explained in the following paragraphs.

4.1.1 Database Normalization. Database normalization is a technique used to simplify and decompose each database table down to its key entities and associated attributes. The goal of normalization is to minimize data redundancy and group common

data elements to allow for easy database manipulation. Each of the five stages of normalization, from first normal form through fifth normal form, further simplifies data. Although data normalization has the advantage of simplifying database updates, its major disadvantage is the creation of many small tables, which can increase the amount of I/O needed for common data retrieval. Therefore, denormalization is sometimes used to optimize a specific application's performance.

Denormalization is the process of taking small tables and combining them into larger tables to reduce I/O, which increases database performance. The major disadvantage of denormalization is the potential for more complex database updates and update anomalies.

4.1.2 Database Indexes. A database index is another mechanism that can increase database performance. Most relational databases sequentially search every row of the database in order to satisfy a specific query. This process can severely hamper performance in large table queries. Each primary key of a table can be indexed so that only the indexes will be searched instead of the entire table in response to a query. The index contains an address of the actual contents of the location of the data. Although indexes can increase performance for data retrievals, the additional internal maintenance required for data deletes and updates can decrease performance.

4.1.3 Physical Design Considerations. Physical design of the database is dependent on the platform used as a database machine. Several physical design considerations should be taken into account to achieve an overall effective design. For example, physically clustering commonly joined tables close to each other can decrease disk access. Setting various database run-time options such as increasing page and buffer size can also increase performance.

4.2 SORTS Data Model

Figure 4-1 provides an entity relationship diagram of the Joint SORTS database. This entity relationship diagram is centered around the BIDE entity. Other entities exist as one-to-one and one-to-many relationships to the BIDE entity. Figure 4-2 and Figure 4-3 are entity relationship diagrams of the service-unique portion of the database.

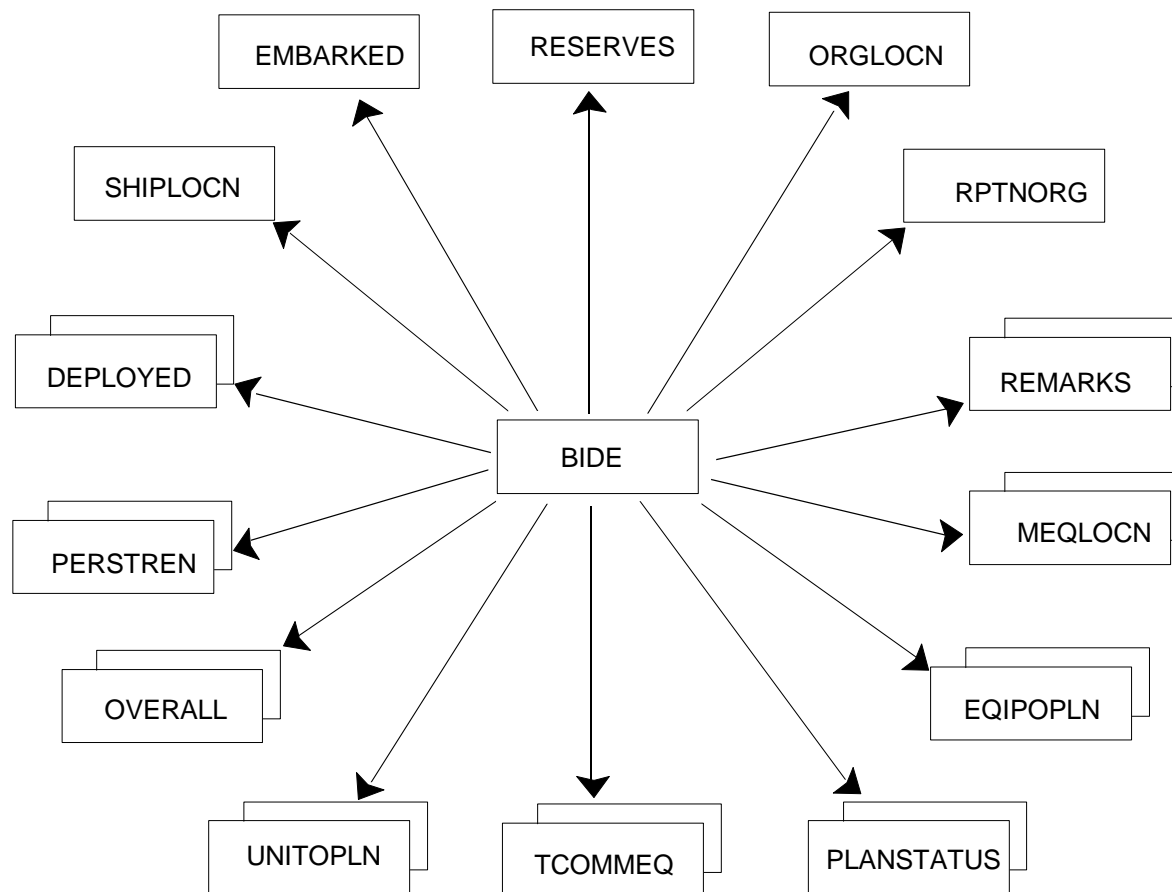

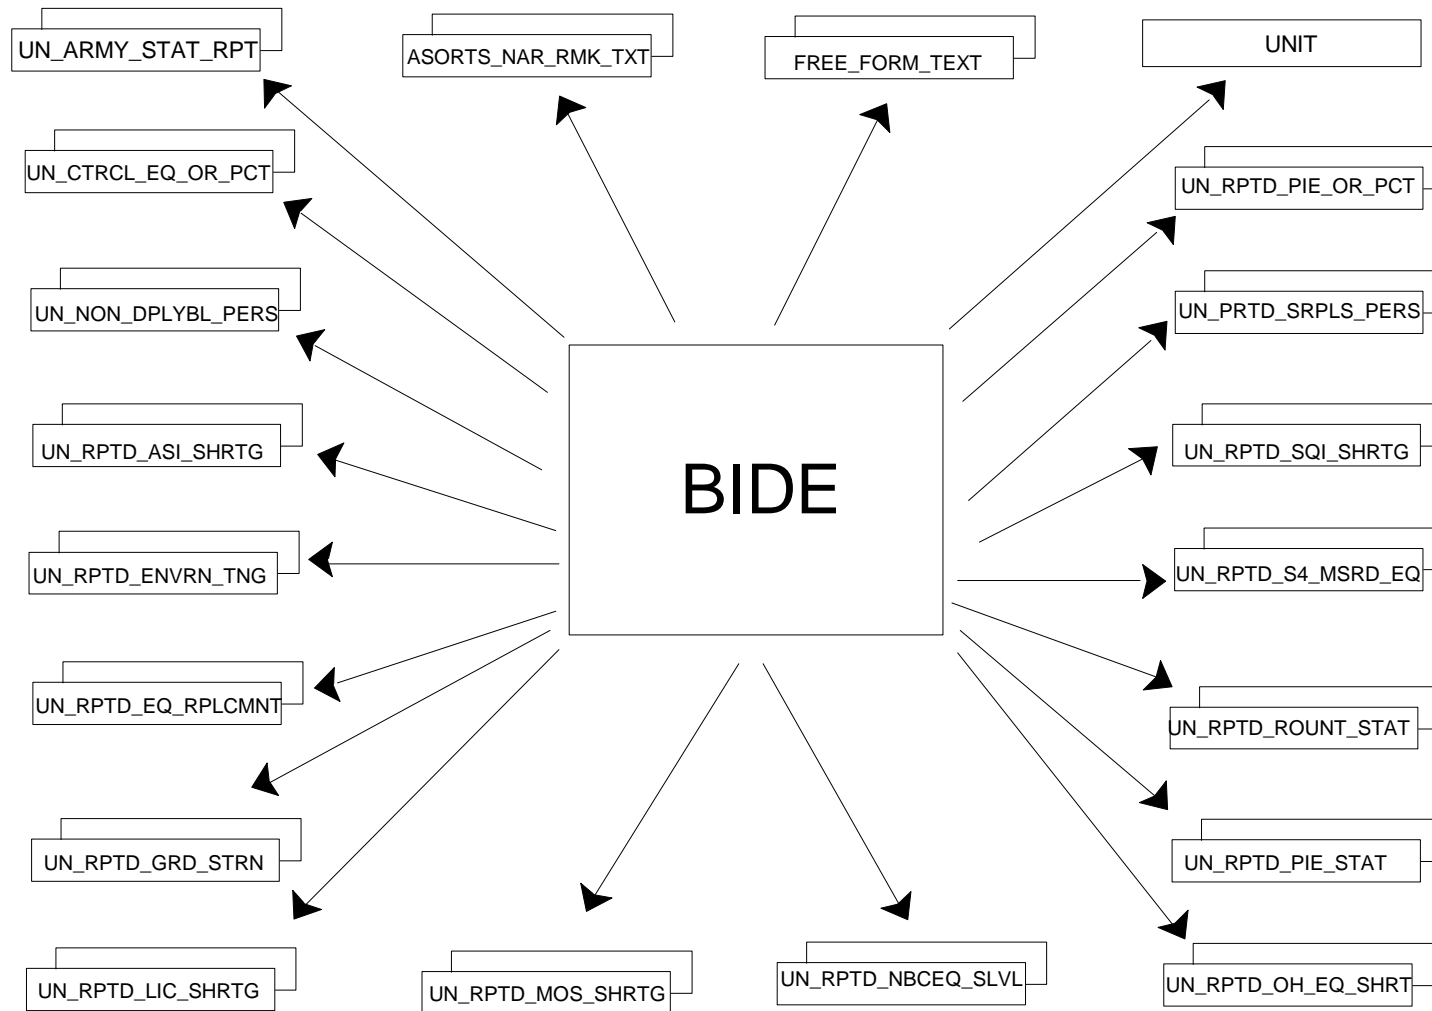

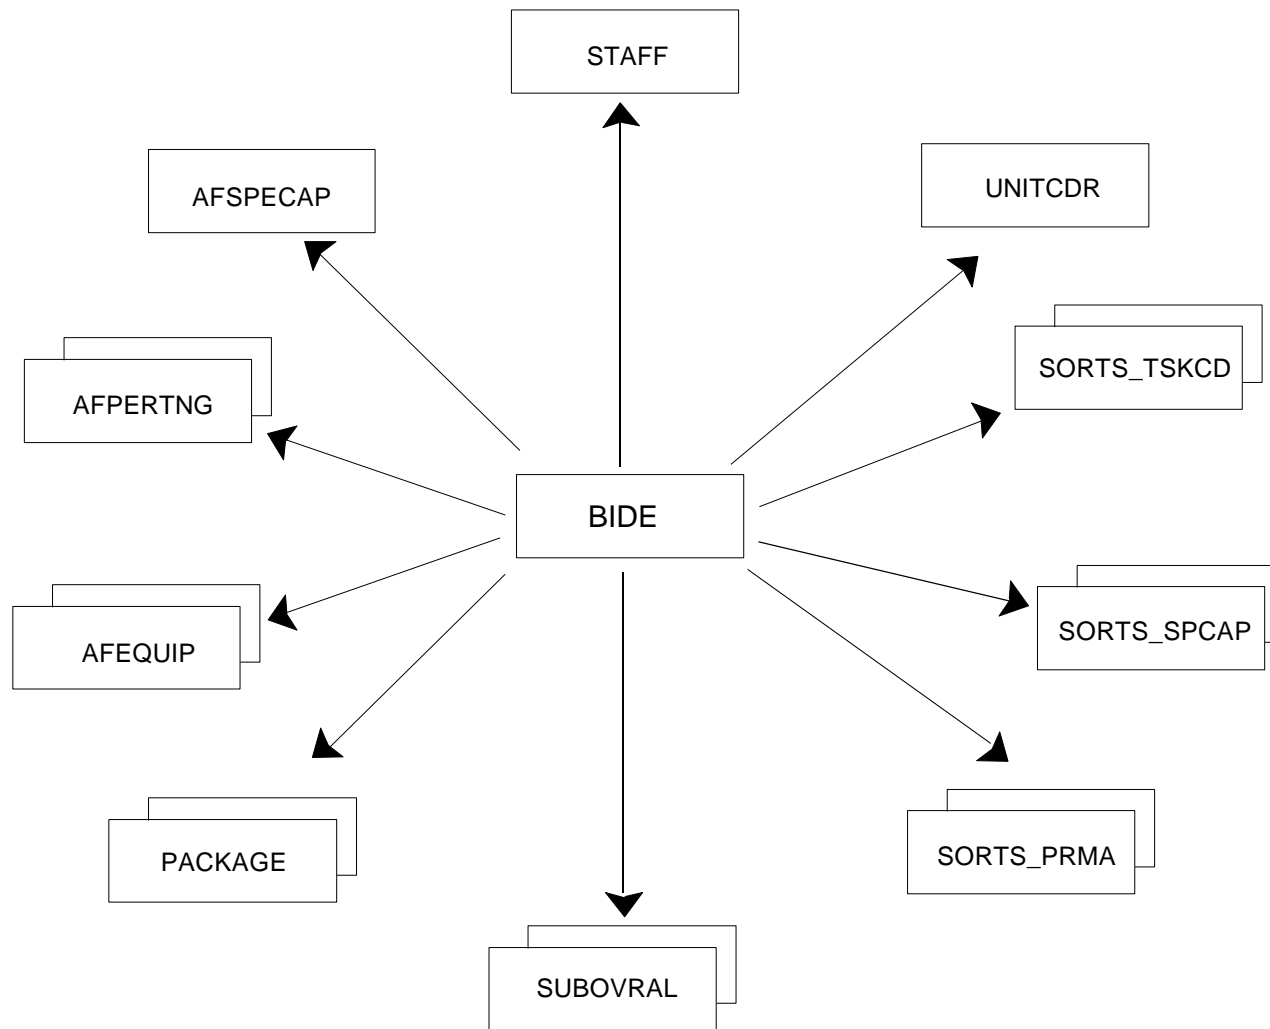

Figure 4-1. Joint Entity Relationship Diagram

4-2. Army Unique Entity Relationship Diagram

4-3. Navy/Air Force Unique Entity Relationship Diagram

4.3 SORTS Database Design

Efficient design of any database requires analysis of the transaction formats used to update and access the database. The general design of any relational database is to group data fields related solely to a common key into one table without generating too many small tables. Many small tables should be avoided as they require table joins to extract desired data, and many transactions to update the database. Alternately, too few large tables can make database updates complicated and lead to integrity problems.

Database update in SORTS is performed entirely by using reported information in the form of USMTF data sets. The database models the USMTF data sets with a few minor exceptions. The Overall set has several associated sets (Personnel, Training, etc). These are grouped together as a segment in the USMTF message. The data from the segment is stored in the database as a single table entry. This provides optimal update efficiency and ease of retrieval of related data items.

In the initial design of the SORTS database, data derived from reference tables was stored in the database. Through a process of testing updates and retrievals, it was determined that the database size could be greatly reduced by removing the derived data from the database. The data can be readily retrieved from the reference tables when needed for reports or data validation. The storage space saved was of more value than the few milliseconds it takes to retrieve the reference data.

Database access in SORTS is provided for in ad-hoc forms and reports. One such facility is the General Interactive Query System (GIQS). GIQS allows the user to select and tailor output as the user deems necessary. The user does not have to be an SQL expert to retrieve data from SORTS. Data is usually accessed using a unit's Unit Identification Code (UIC), which will provide a key or partial key to all tables in the database. Users who report data and consolidate reports will generally access data the same way they report data, extracting data sets as reported on a card requiring few, if any, table joins. Command and control environments, on the other hand, may need data from more than one table at a time. By providing indexes on all current control (key) fields, table join costs will be minimal. Further normalization of the database has been avoided to prevent more tables and thus more table joins.

4.3.1 SORTS Tables. The SORTS database consists of database tables, reference tables, and system validation tables. The

following paragraphs identify and describe these database tables.

4.3.1.1.1 SORTS Joint Tables. SORTS supports the SORTS JRS data elements. Database tables supporting these data elements are described below. Each numbered paragraph contains a brief description of the table's purpose, a list of the data elements in the table, and as appropriate, additional information pertaining to the table.

The data elements are ordered to present the unique key first. Derived elements are indicated using an asterisk (*). Descriptions are provided in brief form for each element as it is listed in the tables. Detailed definitions for each element in the Joint Tables are provided in Appendix A.

Appendix B provides SQL statements for each table.

4.3.1.1.1.1 Basic Identity Information Table. The BIDE table tracks the identity of each unit in the US Armed Forces. Its elements are listed and described in Table 4-1. The UIC field provides a unique key for this table and cannot contain a null value or spaces.

Table 4-1. Basic Identity Information
(BIDE)

Data Element	Element Description
UIC	Unit Identification Code
SECUR	Record Security Class
TIME	Originator/DTG of Last Update
ANAME	Unit Designation
BUPDATE*	Date of Last Update to This UIC
COAFF	Nationality
LNAME	Organization Long Name
MAJOR	Major Unit Indicator
MJCOM	Major Command Unit Identification Code
MONOR	Monitoring Organization Code
REVAL	Unit Registration Validation Code
SCLAS	Security Classification of Organization
SERV*	Service Identification Code
TPSN	Troop Program Sequence Number
UDC	Unit Descriptor Code
ULC	Unit Level Code
UTC	Unit Type Code

4.3.1.1.2 Reporting Organization Table. The RPTNORG table designates the reporting command and associated interested commands who will receive data on a specific unit. In addition, this table tracks the transfer of units between major commands. Its elements are listed and described in Table 4-2. The UIC field provides a unique key for this table and cannot contain a null value or spaces. There must be one RPTNORG table entry per BIDE.

Table 4-2. Reporting Organization
(RPTNORG)

Data Element	Element Description
UIC	Unit Identification Code
ARRDT	Destination Arrival Date
ATACH	Attached Command
DEPDT	Origin Departure Date
GCMD	Gaining Command Unit Identification Code
INTR1 through INTR4	Interested Command Codes One through Four RPTCD Reporting Organization Unit Identification Code
RPTCD	Reporting Organization Code
RPTOR	Reporting Organization Unit Identification Code
SBRPT	Subordinate Reporting Organization Unit Identification Code
SBRPT2	Organization Alternate Subordinate Reporting Code
SECUR	Record Security Classification
TDATE	Effective Transfer Date
TIME	Originator/DTG of Last Update
TRGEO	Destination Geolocation Code

4.3.1.1.3 Organization Location Table. The ORGLOCN table tracks operational and administrative command and control, unit home location and present location, and current unit status and activity codes. Its elements are listed and described Table 4-3. The UIC field provides a unique key for this table and cannot contain a null value or spaces. There should be one ORGLOCN table entry per BIDE.

4.3.1.1.4 Embarked UIC's Table. The EMBARKED table contains information indicating that the entire unit or a portion of it is embarked on a ship. Its elements are listed and described in

Table 4-3. Organization Location
(ORGLOCN)

Data Element	Element Description
UIC	Unit Identification Code
ACTIV	Current Status and Activity Code
ADCON	Administrative Control Unit Identification Code
CBCOM	Combined Command Code
CSERV	CINC, Service or Combatant Command Code
DFCON	DEFCON Status Code
FLAG	Spare Field
HOGEO	Home Geolocation Code
NUCIN	Nuclear Capability Indicator Code
OPCON	Operational Control Unit Identification Code
PCTEF	Effectiveness Percentage
POINT	Geographical Coordinates of Unit's Location
PRGEO	Present Geolocation Code
PUIC	Parent Unit Identification Code
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update
TIME_PA	Originator/DTG of Last POSTATAK Update

Table 4-4. Embarked UIC's (EMBARKED)

Data Element	Element Description
UIC	Unit Identification Code
EMBRK	Embarked on Ship Unit Identification Code
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

4.3.1.1.5 Navy Location Table. The SHIPLOCN table contains positional information about a Navy unit's location and the unit destination. Its elements are listed and described in Table 4-5.

The UIC field provides a unique key for this table and cannot contain a null value or spaces.

Table 4-5. Navy Location
(SHIPLOCN)

Data Element	Element Description
UIC	Unit Identification Code
CXMRS	Checked-Out Movement Reporting System
DETA	Estimated Time of Arrival at Destination in Zulu
ETIME	Header Transaction Time
MODFG	MODLOC Flag
NDEST	Port Name
NEDSC	Geographic Coordinates
NTASK	Task Designator
PLETD	Estimated Time of Departure From Present Location, Zulu
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

4.3.1.1.6 Reserve Information Table. The RESERVES table provides information on extended active duty location, activity, and date of mobilization for reserve component units and mobilization commands. Its elements are listed and described in Table 4-5. The UIC field provides a unique key for this table and cannot contain a null value or spaces.

Table 4-6. Reserve Information (RESERVES)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
ACGEO	Extended Active Duty Geolocation Code
ACITY	Extended Active Duty Activity Code
AC_LOCATION*	Organization Extended Activity Duty-Location Identifier
ADATE	Extended Active Duty Date
ARGO*	Reserve Organization Command Code

Table 4-6. (Part 2 of 2)

4.3.1.1.8 Personnel Strength Table. The PERSTREN table tracks organizational personnel strength information for civilian and U.S. and foreign military personnel. Information such as deployable strength, assigned strength, authorized strength, and structured strength comprise this table. Its elements are listed and described in Table 4-8. The UIC, TPERS, and DEPLY fields provide a unique key for this table and cannot contain a null value or spaces.

Table 4-8. Personnel Strength
(PERSTREN)

Data Element	Element Description
UIC	Unit Identification Code
TPERS	Personnel Type Code
DEPLY	Deployment Location

4.3.1.1.15 Remarks Table. All reported fields except control fields in the SORTS database may have remarks associated with them. Remarks provide reporting units a free text format to explain values reported. Remarks text currently may come from more than one card image. All remarks text for one field will be concatenated together and stored in one data field. The REMARKS table elements are listed and described in Table 4-15. The UIC, RLT, and LABEL fields together provide a key for this table and cannot contain null values or spaces.

Table 4-15. Remarks Table

4.3.1.2 SORTS Service Tables. This paragraph will reference associated appendixes to describe each SORTS data element.

4.3.1.2.1 Air Force Unique Data Elements. The following paragraphs describe the Air Force service unique tables and associated data elements. The data elements are ordered to present the unique key first. Derived elements are indicated using an asterisk (*). Descriptions are provided in brief form for each element as it is listed in the tables. Detailed definitions for each element in the Air Force unique tables are provided in appendix C. The SQL statements for each table are provided in appendix D.

4.3.1.2.1.1 Air Force Unit Mission Table. The AFPERTNG table contains category level data for a unit's mission and addresses the personnel and the training areas. The following table identifies the data elements associated with Table 4-16, the AFPERTNG table. The UIC and DOCNR fields provide a unique key for this table and cannot contain a null value or spaces.

4.3.1.2.1.2 Air Force Wartime Mission Table. The AFEQUIP table contains category level information about wartime equipment and supplies on hand. The following table identifies the data elements associated with Table 4-17, the AFEQUIP table. The UIC

Table 4-16. Air Force Unit Mission
(AFPRTNG)

Data Element	Element Description
UIC	Unit Identification Code
DOCNR	Designed Operational Capability Number
BUDATE	Update Date
CPASG	Count of Critical Personnel Assigned
CPAUR	Critical Personnel Authorized or Required
CPAVL	Count of Critical Personnel Available
DOCID	DOC Identifier Code
PERTC	Critical Personnel Percentage
PERTP	Total Personnel Percentage
SECUR	Record Security Classification
TCARQ	Number of Crews Authorized or Required
TCRAS	Count of Crews Assigned
TCRAV	Count of Crews Available
TIME	Originator/DTG of Last Update
TMTHD	Method of Computing Training Level
TPASG	Total Personnel Assigned
TPAUT	Total Personnel Authorized or Required
TPAVL	Count of Total Personnel Available
TRSA1	Training Subarea 1 Percentage
TRSA2	Training Subarea 2 Percentage
TRSA3	Training Subarea 3 Percentage
TRSA4	Training Subarea 4 Percentage
TRSA5	Training Subarea 5 Percentage
TRUTC	Training Area Measured Percentage

and DOCNR fields provide a unique key for this table and cannot contain a null value or spaces.

4.3.1.2.1.3 Air Force Secondary Wartime Mission Table. The SUBOVRAL table contains category level information about a unit's secondary or subordinate wartime missions. The following table identifies the data elements associated with Table 4-18, the SUBOVRAL table. The UIC and DOCNR fields provide a unique key and cannot contain a null value or spaces.

Table 4-17. Air Force Wartime Mission (AFEQUIP)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
DOCNR	Designed Operational Capability Number
BUDATE	Update Date
EQRED	Support Equipment Condition Percentage
EQREE	Combat Essential Equipment Condition Percentage
EQSEE	Combat Essential Equipment and Supplies on hand Percentage
EQSSE	Support Equipment and Supplies on Hand Percentage
ERSA1	Individual Equip. Condition Subarea Pct. 1
ERSA2	Individual Equip. Condition Subarea Pct. 2
ERSA3	Individual Equip. Condition Subarea Pct. 3
ERSA4	Individual Equip. Condition Subarea Pct. 4
ERSA5	Individual Equip. Condition Subarea Pct. 5
ERSA6	Individual Equip. Condition Subarea Pct. 6
ERSA7	Individual Equip. Condition Subarea Pct. 7
ERSA8	Individual Equip. Condition Subarea Pct. 8

4.3.1.2.1.4 Air Force Special Capability Table. The AFSPECAP table contains aircraft and crew data available for special missions. The following table identifies the data elements associated with Table 4-19, the AFSPECAP table. The UIC field provides the key and cannot contain a null value or spaces.

Table 4-19. Air Force Special Capability (AFSPECAP)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
ACFTA	Aircraft Availability Percentage
ARUSD	Spares Assessment Driver
GCCLA	Number of Graduated Combat Capability Level A Crews
GCCLB	Number of Graduated Combat Capability Level B Crews
GCCLC	Number of Graduated Combat Capability Level C Crews
SMAA1	Number of Aircraft Available for Special Mission First
SMAA2	Number of Aircraft Available for Special Mission Second
SMAA3	Number of Aircraft Available for Special Mission Third

Table 4-19. (Part 2 of 2)

SMAA4	Number of Aircraft Available for Special Mission Fourth
SMAC1	Number of Special Mission Crews Available First
SMAC2	Number of Special Mission Crews Available Second
SMAC3	Number of Special Mission Crews Available Third
SMAC4	Number of Special Mission Crews Available Fourth
SMCC1	Special Mission Capability Code First
SMCC2	Special Mission Capability Code Second
SMCC3	Special Mission Capability Code Third
SMCC4	Special Mission Capability Code Fourth
SMRA1	Number of Aircraft Required for Special Mission First
SMRA2	Number of Aircraft Required for Special Mission Second
SMRA3	Number of Aircraft Required for Special Mission Third
SMRA4	Number of Aircraft Required for Special Mission Fourth
SMRC1	Number of Special Mission Crews First
SMRC2	Number of Special Mission Crews Second
SMRC3	Number of Special Mission Crews Third
SMRC4	Number of Special Mission Crews Fourth
SORTE	SORTE Generation Capability Percentage
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update
WRSK	WRSK/BLSS Fill Percentage

4.3.1.2.1.5 Air Force Transportable Equipment Table. The PACKAGE table contains equipment status and location of transportable equipment. The following table identifies the data elements associated Table 4-20, with the PACKAGE table. The UIC, UTC, and MESEN fields provide a key for this table and cannot contain a null value.

Table 4-20. Air Force Transportable Equipment
(PACKAGE)

Data Element	Element Description
UIC	Unit Identification Code
UTC	Unit Type Code
MESEN	Communications Equipment Identifier
DCNDY	Deployment Control Number
DTASK	DOC Tasked Indicator
EQRET	Equipment Return Date
EXDAC	Upgraded Equipment Availability Code
GEOGR	Equipment Geolocation Code
PEQFR	Forecast Date Prime Equipment Ready
PEQS	Prime Equipment Operational Status
SECUR	Record Security Classification
SEDY	Support Equipment Status
SEQFR	Forecast Date Support Equipment Ready
TEAFR	Forecast Date Team Status Satisfactory
TEDY	Assigned Team Status
TIME	Originator/DTG of Last Update
UTCFR	Forecast Date UTC Ready

4.3.1.2.2 Navy Unique Data Elements. The following paragraphs describe the Navy service unique table and associated data elements. The data elements are ordered to present the unique key first. Derived elements are indicated using an asterisk (*). Descriptions are provided in brief form for each element as it is listed in the tables. Detailed definitions for each element in the Air Force unique tables are provided in appendix D. The SQL statements for each table are provided in appendix E.

4.3.1.2.2.1 Navy Unit Commander Table. This table contains information about the Commanding Officer of a unit. The following table identifies the data elements associated with Table 4-21, the UNITCDR table.

4.3.1.2.2.2 Navy Primary Mission Table. This table contains information about the primary mission area of a unit. The following table identifies the data elements associated Table 4-22, with the UNITCDR table.

Table 4-21. Navy Unit Commander Table
(UNITCDR)

Data Element	Element Description
UIC	Unit Identification Code
DOR	Date of Rank
LINEAL	Lineal Precedence Number
NAME	Name, Individual
RANK	Rank of Commander
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

Table 4-22. Navy Primary Mission Table
(SORTS_PRMA)

Data Element	Element Description
UIC	Unit Identification Code
PRMA	Primary Mission Area
CHDAT	Not Used (same as TIME)
FCDAT	Forecasted Rating Date
FMART	Forecasted Rating
MARAT	PRMAR Readiness Rating
MARE1	Primary Reason
MARE2	Secondary Reason
MARE3	Tertiary Reason
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

The UIC and PRMA fields provide a key for this table and cannot contain a null value.

4.3.1.2.2.3 Navy Special Capabilities Table. This table contains the special capabilities of a particular command. The following table identifies the data elements associated with Table 4-23, the SORTS_SPCAP table.

4.3.1.2.2.4 Navy Task Command Table. This table provides information about task commands associated with a unit. The following table identifies the data elements associated with Table 4-24, the SORTS_TSKCD table.

4.3.1.2.2.5 Navy Staff Table. This table provides information about the commands staff relationships. The following table identifies the data elements associated with Table 4-25, the STAFF table.

Table 4-23. Navy Special Capabilities Table
(SORTS_SPCAP)

Data Element	Element Description
UIC	Unit Identification Code
SPCAP	Special Capability Code
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

Table 4-24. Navy Task Command Table
(SORTS_TSKCD)

Data Element	Element Description
UIC	Unit Identification Code
TSKCD	ANAME of Task Command
TASK_ORG	UIC of Task Command
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

Table 4-25. Navy Staff Table
(STAFF)

Data Element	Element Description
UIC	Unit Identification Code
FLEET	Fleet Code
TYCOM	Type of Command Code
SECUR	Record Security Classification
TIME	Originator/DTG of Last Update

4.3.1.2.3 Army Unique Data Elements. The following paragraphs describe the Army service unique table and associated data elements. The data elements are ordered to present the unique key first. Derived elements are indicated using an asterisk (*). Descriptions are provided in brief form for each element as it is listed in the tables. Detailed definitions for each element in the Army unique tables are provided in appendix G. The SQL statements for each table are provided in appendix H.

4.3.1.2.3.1 Army ASORTS Narrative & Remark Text Table. This table provides storage for narrative and remark free text in Army Status of Resources and Training System (ASORTS) USMTF reports SORTSREPAR. Its elements and descriptions are listed in Table 4-26.

Table 4-26. Army ASORTS Narrative & Remark Text
(ASORTS_NAR_RMK_TXT)

Data Element	Element Description
ASORTS_RPTD_UIC	Unit Identification Code
ASORTS_RPT_TYP_CD	USMTF Report Type Code
ASORTS_RPT_DT	Report Date
ASORTS_TEXT_TYP_CD	Standard Free Form Text Type Code
FREE_FORM_TEXT	Free Form Text
RECORD_CLASSN_CD	Record Security Classification

The ASORTS_RPTD_UIC, ASORTS_RPT_DT, and ASORTS_RPT_TYP_CD fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.2 Army Free Form Text Table. This table provides storage for free form text that is associated with data records in the database. The text records in this table are linked to a specific data record or group of records by the data table name and a data record identifier. The identifier is the concatenation of a data record's primary key values for a single record, partial primary key values for a group of records, or other data string that uniquely identifies a database record or group of records. The elements and descriptions are listed in Table 4-27. The fields AWIS_DB_RCRD_ID, AWIS_TBL_SHRT_NM, and FREE_TEXT_SBJCT_ID provide a key to this table and cannot contain a null value.

Table 4-27. Army Free Form Text
(FREE_FORM_TEXT)

Data Element	Element Description
AWIS_DB_RCRD_ID	AWIS Standard Database Record Identifier
AWIS_TBL_SHRT_NM	AWIS Standard Database Table Short Name
FREE_FORM_TEXT	Free Form Text
FREE_TEXT_SBJCT_ID	Free Text Subject Identifier
RECORD_CLASSN_CD	Record Security Classification

4.3.1.2.3.3 Army Unit Table. This table provides the basic identity and description of operational active and reserve component units that have been registered with the Chairman of the Joint Chiefs of Staff. The elements and descriptions are listed in Table 4-28. The UIC field provides a key for this table and cannot contain a null value.

Table 4-28. Army Unit Table (UNIT)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
ARMY_HQ_ID_CD	U.S. Army Headquarters Identifier Code
ASGMT	Unit Assignment Code
AVNCD	FORSCOM Aviation Unit Identification Code
BR	Unit Parent Branch Code
COMPO	Unit Duty Status Component Code
DAMPL	Army Master Priority List Code
ELSEQ	Unit assigned element sequence Number
EQUIP_REDIST_GEO	Equipment Redistribution Geolocation Code
FORCE_FLD	Unit Registration Category
FUAC	Unit Functional-area Code
HO_LOCATION	Organization Home-location Identifier
IFREQ	Organization Increased Report Frequency Identifier
ITAADS	The Army Authorization Documents System Installation Code
LIC	Logistic Indicator Code
MAC	Army Major Command Identifier
NRDY	FORSCOM Nato Readiness Code
OBFC	Force Objective CODE
ODATE	Organization Status Change Calendar Date
OESTS	Organization Status Code
ORG_ACTV_DSG	Organization Originating Activity Description
PACING	FORSCOM Pacing Item Unit Identification Code
PAOD	Unit Planned Activation-organization Code

Table 4-28. (Part 2 of 2)

PIDD	Unit Planned Inactivation- disestablishment Schedule Calendar Date
PLGEO	Unit Planned Geolocation Code
PL_LOCATION	Unit Planned-location Identifier
POMCUS_ID_CD	Unit POMCUS Identification Code
PPA	Organization PERSINS-processing-activity Code
PR_LOCATION	Organization Present Location Identifier
RECORD_CLASSN_CD	Record Security Classification
ROBCO	Unit Readiness Objective Code
R_AFF	Unit Regimental Affiliation Identifier
SEQKEY	FORSCOM Unit Readiness Reporting Sequence Sort Key
SORTS_RPTG_ROLE_CD	Status of Resources and Training Reporting Role Code
SRC	Unit Standard Requirement Code
STATC	Organization Personnel Readiness Status Code
TAADS	Unit Parent Designator Code
TAEDP_MACOM	Army Equipment Distribution Plan Command IDENTIFIER
TAPFOR	Army Reporting Installation FORSTAT Code
TPSN5	Unit Troop Program Sequence Basic Number
TPSNCD	FORSCOM Troop Program Sequence Number Identification Code
UNIT_ORG_EFF_DATE	Unit Organization Effective Date
UNIT_ORG_TYP_CD	Unit Basic Organization Type Code
UNR	Unit Number
UN_ACTL_ACTVTN_DT	Unit Actual Activation Date
UN_PLND_AVLBLTY_DT	Unit Planned Availability Date
UN_PRSNT_GEO_COORD	Unit Present Location Geographic Coordinates
UN_PRSNT_LOC_APO	Unit Present Location Army Post Office World Area Code
UN_PRSNT_LOC_ZIP	Unit Present Location Zoning Improvement Plan U.S. Postal Distribution Code

4.3.1.2.3.4 Army Unit Army Status Report Table. This table contains the Army unique supplemental data to help army agencies analyze a unit's status. Its elements and descriptions are listed in Table 4-29.

The UIC, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-29. Army Unit Army Status Report (UN_ARMY_STAT_RPT)
(Part 1 of 3)

Data Element	Element Description
UIC	Unit Identification Code
ARMY_STAT_RPT_DT	Unit Army Resources And Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type
AGR_ASGD	Unit Active Guard-Reserve Personnel Assigned Strength Quantity
ALO	Organization Authorized Level Code
APERT	Unit Personnel Turnover Percent
ASPER	Assigned Strength Percentage
ASRAT	Assigned Strength Percentage Rating
AUTH_DOC_EFCTV_DT	Authorization Document Effective Date
AVPER	Personnel Available Strength Percent
AVRAT	Personnel Computed Available Strength Percentage Rating Code
C5	Unit Subordinate C5-Rated Quantity
CCNUM	Authorization Document Command Control Number
COHORT_E4	Unit Cohort E4-AS-E5 Senior Grade Quantity
EHRD1	Unit Reported Equipment Readiness Code "A" Measured Resource Level One
EHRD2	Unit Reported Equipment Readiness Code "A" Measured Resource Level Two
EHRD3	Unit Reported Equipment Readiness Code "A" Measured Resource Level Three

Table 4-29. (Part 2 of 3)

EHRD4	Unit Reported Equipment Readiness Code "A" Measured Resource Level Four
EHRDBC1	Unit Reported Equipment Readiness Code "B" and "C" Measured Resource Level One
EHRDBC2	Unit Reported Equipment Readiness Code "B" and "C" Measured Resource Level Two
EHRDBC3	Unit Reported Equipment Readiness Code "B" and "C" Measured Resource Level Three
EHRDBC4	Unit Reported Equipment Readiness Code "B" and "C" Measured Resource Level Four
EHRDN	Unit Reported Equipment Readiness Code "A" Total On-hand Quantity
EHRDNBC	Unit Reported Equipment Readiness Code "B" and "C" Total On-hand Quantity
FEM_ASGD	Unit Reported Female Personnel Assigned Quantity
FEM_PREG	Unit Reported Pregnant Female Personnel Assigned Quantity
ITAEM	Training Materiel Availability Impact Code
ITAFL	Training Fuel Availability Impact Code
ITAFT	Training Fund Availability Impact Code

UNIT_AUTH_DOC_NBR	Unit Authorization Document Number
RECORD_CLASSN_CD	Record Security Classification

4.3.1.2.3.5 Army Unit Reported Critical Equipment or Percentage Table. This table contains the unit reported critical equipment items that are reducing the unit's equipment serviceability level below R-1. Its elements and descriptions are listed in Table 4-30. The UIC, CRTCL_EQ_ITEM_LIN, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-30. Army Unit Reported Critical Equipment or Percentage
(UN_CRTCL_EQ_OR_PCT)

Data Element	Element Description
UIC	Unit Identification Code
CRTCL_EQ_ITEM_LIN	Unit Reported Critical Equipment Item Line Number
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
CRTCL_EQ_NM	Unit Reported Critical Equipment Item
CRTCL_EQ_OR_PCTG	Unit Reported Critical Equipment Item Operationally Ready Percentage
EQ_NON_OR_RSN_CD	Unit Reported Critical Equipment Item Non-operationally Ready Reason Code
ERC	Equipment Readiness Code
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

4.3.1.2.3.6 Army Unit Reported Non-Deployable Personnel Table. This table provides storage for narrative and remark free text in Army Status of Resources and Training System (ASORTS) USMTF reports SORTSREPAR. Its elements and descriptions are listed in Table 4-31. The UIC, NON_DPLYBL_RSN_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.7 Army Unit Reported Additional Skill Shortage Table. This table provides storage for narrative and remark free text in Army Status of Resources and Training System (ASORTS) USMTF reports SORTSREPAR. Its elements and descriptions are listed in Table 4-32. The UIC, ASI, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-31. Army Unit Reported Non-deployable Personnel Table
(UN_NON_DPLYBL_PERS)

Data Element	Element Description
UIC	Unit Identification Code
NON_DPLYBL_RSN_CD	Unit Non-deployable Personnel Reason Code
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
NON_DPLYBL_PER_QTY	Unit Reported Non-deployable Personnel Quantity
RECORD_CLASSN_CD	Record Security Classification Code

Table 4-32. Army Unit Reported Additional Skill Shortage
(UN_RPTD_ASI_SHRTG)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
ASI	Personnel Additional Skill Identifier
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
ASI_ASGD	Unit Personnel Additional Skill-identifier Assigned Strength Quantity
ASI_AUTH	Unit Personnel Additional Skill-identifier Authorized Strength Quantity
ASI_REQ	Unit Personnel Additional Skill-identifier Required Strength Quantity
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

4.3.1.2.3.8 Army Unit Reported Environmental Training Table. This table contains unit reported nuclear-biological-chemical (NBC) defense, warm weather, and cold weather training status data. Its elements and descriptions are listed in Table 4-33. The UIC, ENVRNMNTL_TNG_CAT, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-33. Army Unit Reported Environmental Training
(UN_RPTD_ENVRN_TNG)

Data Element	Element Description
UIC	Unit Identification Code
ENVRNMNTL_TNG_CAT	Unit Reported Environmental Training Category Identifier
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
ENVRNMNTL_TNG_LVL	Unit Reported Environmental Training Status Level Code
ENVRNMNTL_TNG_RMK	Unit Reported Environmental Training Status Remark Text
LVL1_ADTNL_TNG_DYS	Unit Reported Level-1 Additional Training Days Required Quantity
RECORD_CLASSN_CD	Record Security Classification

4.3.1.2.3.9 Army Unit Reported Equipment Replacement Item Table. This table contains unit reported equipment items that were used or not used as a replacement for a required equipment item in the unit's on-hand equipment status computation. Its elements and descriptions are listed in Table 4-34. The UIC, UN_EQ_RPLCMNT_CAT, UN_EQ_RPLCMNT_LIN, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-34. Army Unit Reported Equipment Replacement Item
(UN_RPTD_EQ_RPLCMNT)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
UN_EQ_RPLCMNT_CAT	Unit Reported Equipment

Table 4-34. (Part 2 of 2)

	Replacement Item Category
UN_EQ_RPLCMNT_LIN	Unit Reported Equipment
	Replacement Line Item Number
RECORD_CLASSN_CD	Record Security Classification

4.3.1.2.3.10 Army Unit Reported Grade Strength Table. This table contains the unit reported grade strength to include the required and authorized strength from the unit's authorization document, the assigned strength from the Army personnel system and available strength from the unit's records. Its elements and descriptions are listed in Table 4-35.

Table 4-35. Army Unit Reported Grade Strength
(UN_RPTD_GRD_STRN)

Data Element	Element Description
UIC	Unit Identification Code
PERSL_GRD_RNG_CD	Unit Personnel Grade Range Code
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
GRADE_ASGD	Unit Grade Assigned Strength Quantity
GRADE_AUTH	Unit Grade Authorized Strength Quantity
GRADE_AVAIL	Unit Grade Available Strength Quantity
GRADE_REQ	Unit Grade Required Strength Quantity
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number
RECORD_CLASSN_CD	Record Security Classification

The UIC, PERSL_GRD_RNG_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.11 Army Unit Reported Language Skill Shortage Table. This table provides storage for narrative and remark free text in Army Status of Resources and Training System (ASORTS) USMTF reports SORTSREPAR. Its elements and descriptions are listed in Table 4-36.

Table 4-36. Army Unit Reported Language Skill Shortage Table
(UN_RPTD_LIC_SHRTG)

Data Element	Element Description
UIC	Unit Identification Code
UN_AUTH_LIC	Unit Authorized Personnel Position Language Indicator Code
UN_AUTH_LIC_MOS_CD	Unit Authorized Personnel Position Special Language Capability Military Occupational Code
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
RECORD_CLASSN_CD	Record Security Classification
UN_LIC_ASGD_QTY	Unit Personnel Position Special Language Capability Assigned Quantity
UN_LIC_QLFD_QTY	Unit Special Language Capability Qualified Personnel Quantity
UN_LIC_REQD_QTY	Unit Personnel Position Special Language Capability Required Quantity
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

The UIC, UN_AUTH_LIC, UN_AUTH_LIC_MOS_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.12 Army Unit Reported MOS Shortage Table. This table contains the unit reported shortages of personnel that possess the required military occupational specialty for the associated grade required in the unit's authorization document. Its elements and descriptions are listed in Table 4-37.

Table 4-37. Army Unit Reported MOS Shortage
(UN_RPTD_MOS_SHRTG)

Data Element	Element Description
UIC	Unit Identification Code
MOS	Military-civilian Occupational Specialty Code
MOS_GRD_CD	Unit Personnel MOS-Grade Code

ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
MOS_P3_ADTNL_PERSL	Unit Reported MOS-Grade Strength Personnel Level Three Additional Personnel
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

The UIC, MOS, MOS_GRD_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.13 Army Unit Reported NBC Equipment Category S LEVEL Table. This table provides the on-hand equipment measured resource level (S-LEVEL) for the category of NBC equipment reported by the unit. Its elements and descriptions are listed in Table 4-38.

Table 4-38. Army Unit Reported NBC Equipment Category S_LEVEL
(UN_RPTD_NBCEQ_SLVL)

Data Element	Element Description
UIC	Unit Identification Code
NBC_EQ_CAT_ID	Unit Reported On-hand NBC Equipment Shortage Category Identifier
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
NBC_EQ_CAT_S_LVL	Unit Reported On-hand NBC Equipment Category Measured Resource Level Category
RECORD_CLASSN_CD	Record Security Classification

The UIC, NBC_EQ_CAT_ID, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.14 Army Unit Reported On-hand Equipment Shortage Table. This table contains the unit reported on-hand equipment item shortages. The table includes the required, authorized and on-hand quantities for the equipment line item that is reported. Its elements and descriptions are listed in Table 4-39.

Table 4-39. Army Unit Reported On-hand Equipment Shortage
(UN_RPTD_OH_EQ_SHRT)

Data Element	Element Description
UIC	Unit Identification Code
ERC	Equipment Readiness Code
UN_EQ_SHRTG_LIN	Unit Reported Equipment Item Shortage Line Number
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources And Training Status Report Type Code
RECORD_CLASSN_CD	Record Classification
UN_EQ_AUTH_QTY	Unit Reported Equipment Item Authorized Quantity
UN_EQ_OH_QTY	Unit Reported Equipment Item On-hand Quantity
UN_EQ_REQD_QTY	Unit Reported Equipment Item Required Quantity
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

The UIC, UN_EQ_SHRTG_LIN, ERC, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.15 Army Unit Reported Pacing Item Equipment or Percentage Table. This table Its elements and descriptions are listed Table 4-40. The UIC, PCNG_ITEM_EQ_LIN, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.16 Army Unit Reported Pacing Item Equipment Status Table. This table contains the unit reported on-hand equipment status to include the quantity required and authorized in the unit's authorization document and the quantity that has been counted in the on-hand equipment computation. Its elements and descriptions are listed Table 4-41. The UIC, PCNG_ITEM_EQ_LIN, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.17 Army Unit Reported Round out Unit Status Table. This table Its elements and descriptions are listed in Table 4-42. The UIC, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-40. Army Unit Reported Pacing Item Equipment or
Percentage
(UN_RPTD_PIE_OR_PCT)

Data Element	Element Description
UIC	Unit Identification Code
PCNG_ITEM_EQ_LIN	Unit Reported Pacing Item Equipment Line Item Number
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
PCNG_ITEM_EQ_NM	Unit Reported Pacing Item Equipment Name
PCNG_ITEM_OR_PCTG	Unit Reported Pacing Equipment Operational Readiness Percentage
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

Table 4-41. Army Unit Reported Pacing Item Equipment Status
(UN_RPTD_PIE_STAT)

Data Element	Element Description
UIC	Unit Identification Code
PCNG_ITEM_EQ_LIN	Unit Reported Pacing Item Equipment Line Item Number
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
PCNG_ITEM_AUTH_QTY	Unit Equipment Pacing Item Authorized Quantity
PCNG_ITEM_OH_QTY	Unit Reported Pacing Item Equipment On-hand Quantity
PCNG_ITEM_REQD_QTY	Unit Equipment Pacing Item Required Quantity
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

Table 4-42. Army Unit Reported Round_out Unit Status
(UN_RPTD_ROUND_STAT)

Data Element	Element Description
UIC	Unit Identification Code
ARMY_STAT_RPT_DT	Unit Army Resources and Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources and Training Status Report Type Code
RECORD_CLASSN_CD	Record Security Classification
ROUND_COMP_EOH	Unit Roundout Composite Report Equipment On-hand C-Level Code
ROUND_COMP_ER	Unit Roundout Composite Report Equipment Readiness C-Level Code
ROUND_COMP_OVAL	Unit Roundout Composite Report Overall C-Level Code
ROUND_COMP_PER	Unit Roundout Composite Report Personnel C-Level Code
ROUND_COMP_TR	Unit Roundout Composite Report Training Readiness C-Level Code
ROUND_EOH	Unit Roundout Equipment On-hand C-Level Code
ROUND_ER	Unit Roundout Equipment Readiness C-Level Code
ROUND_NAME	Unit Roundout Abbreviated Unit Name
ROUND_OVAL	Unit Roundout Overall C-Level Code
ROUND_PER	Unit Roundout Personnel C-Level Code
ROUND_TR	Unit Roundout Training Readiness C-Level Code

4.3.1.2.3.18 Army Unit Reported S4 Measured Equipment Table. This table contains the unit reported on-hand equipment items that have a measured resource area level of four. Its elements and descriptions are listed in Table 4-43. The UIC, ERC, UN_S4_EQ_ITEM_LIN, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

4.3.1.2.3.19 Army Unit Reported SQI Shortage Table. This table contains the unit reported personnel shortage for a specific special qualification identifier authorized to the unit in the unit's authorization document. Its elements and descriptions are listed in Table 4-44. The UIC, UN_AUTH_SQI_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-43. Army Unit Reported S4 Measured Equipment
(UN_RPTD_S4_MSRD_EQ)

Data Element	Element Description
UIC	Unit Identification Code
ERC	Equipment Readiness Code
UN_S4_EQ_ITEM_LIN	Unit Reported On-hand Equipment Measured Resource Level Four Item Line Number
ARMY_STAT_RPT_DT	Unit Army Resources And Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources And Training Status Report Type Code
RECORD_CLASSN_CD	Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number
UN_S4_EQ_AUTH_QTY	Unit Reported On-hand Equipment Measured Resource Level Four Authorization Quantity
UN_S4_EQ_OH_QTY	Unit Reported On-hand Equipment Measured Resource Level Four On-hand Quantity
UN_S4_EQ_REQD_QTY	Unit Reported On-hand Equipment Item Measured Resource Level Four Required Quantity

4.3.1.2.3.20 Army Unit Reported Surplus Personnel Table. This table contains the unit reported surplus personnel for each military occupational specialty and associated grade in which the surplus exists. Its elements and descriptions are listed in Table 4-45. The UIC, SRPLS_MOS_GRD_CD, SRPLS_PERSL_MOS_CD, ARMY_STAT_RPT_DT, and ARMY_STAT_RPT_TYP fields provide a key for this table and cannot contain a null value.

Table 4-44. Army Unit Reported SQI Shortage
(UN_RPTD_SQI_SHRTG)
(Part 1 of 2)

Data Element	Element Description
UIC	Unit Identification Code
UN_AUTH_SQI_CD	Unit Authorized Personnel Position Special Qualification Identifier Code
ARMY_STAT_RPT_DT	Unit Army Resources And Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources And Training

Table 4-44. (Part 2 of 2)

RECORD_CLASSN_CD	Status Report Type Code Record Security Classification
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number
UN_SQI_ASGD_QTY	Unit Personnel Position Special Qualification Assigned Quantity
UN_SQI_AUTH_QTY	Unit Personnel Position Special Qualification Authorized Quantity
UN_SQI_REQD_QTY	Unit Personnel Position Special Qualification Required Quantity

Table 4-45. Army Unit Reported Surplus Personnel
(UN_RPTD_SRPLS_PERS)

Data Element	Element Description
UIC	Unit Identification Code
SRPLS_MOS_GRD_CD	Unit Reported Surplus Personnel Military Occupational Specialty Grade Code
SRPLS_PERSL_MOS_CD	Unit Reported Surplus Personnel Military Occupational Specialty Code
ARMY_STAT_RPT_DT	Unit Army Resources And Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources And Training Status Report Type Code
RECORD_CLASSN_CD	Record Security Classification
SRPLS_MOS_GRD_QTY	Unit Reported Military Occupational Specialty Grade Surplus Personnel Quantity
UN_RPTD_SEQ_NBR	Unit Reported Information Sequence Number

4.3.2 SORTS Reference Tables. Reference tables are used in the SORTS community to resolve codes stored within the SORTS database. Both service unique and joint reference tables are described in the following paragraphs.

4.3.2.1 Major Equipment Table. The MEQPT table contains information about equipment used in the service community. The following table identifies the data elements associated with Table 4-46, the MEQPT table.

Table 4-46. Major Equipment
(MEQPT)

Data Element	Element Description
CINCFORCE	Force Command interest
CINCSTRAT	Strategic Command interest
MEQPT_KEY	Equipment Name Code
JSTAFF	Joint Staff interest
MECAP	Major Equipment Capability Indicator
MECL	Major Equipment Functional Classification Code
MEG_NAME	Equipment Name
MEQDT	Equipment Date
MODEL	Major Equipment Model
SECURE	Major Equipment Security Classification
USA	U.S. Army interest
USAF	U.S. Air Force interest
USACOM	U.S. Atlantic Command interest
USCENT	U.S. Central Command interest
USCG	U.S. Coast Guard interest
USEUCOM	U.S. European Command interest
USMC	U.S. Marine Corps interest
USN	U.S. Navy interest
USNORAD	U.S. NORAD Interest
USPACOM	U.S. PACIFIC command interest
USSOCOM	U.S. Special Ops Command interest
USSOUTH	U.S. Southern Command interest
USSPACE	U.S. Space Command interest
USTC	U.S. Transportation Command interest

4.3.2.2 Type Unit Characteristics Table. The TUCHA table contains common distinguishing characteristics codes used in SORTS to resolve codes stored in the UTC field. The following table identifies the data elements associated with Table 4-47, the TUCHA table.

Table 4-47. Type Unit Characteristics
(TUCHA)

Data Element	Element Description
UTC	Unit Type Code
TYPNM	Unit Type Long Name

4.3.2.3 Geographic Location Table. The GEO table contains location information used to resolve location codes into actual location names. The following table identifies the data elements associated with Table 4-48, the GEO table.

Table 4-48. Geographic Location (GEO)
(Part 1 of 2)

Data Element	Element Description
GEO_KEY	Geographic Location Code
NAME_GEO	Geographic Location Name
TYPECOD	Installation Type Code
CRT_CD_GEO	Country/International Affiliation Code
SNAME	Short Country/State Name
PC_GEO	Province/County Name
PNAME	Country Province Name
TACKZ_GEO	Military Region Code
LAT_GEO	Geographic Latitude
LONG_GEO	Geographic Longitude
LPR_POS1_GEO	Logistics Planning Code Position 1
LPR_POS2_GEO	Logistics Planning Code Position 2
GEOPR_GEO	Prime Geolocation Code
UIC	Unit Identification Code
ICAOCOD	International Civil Aviation Organization Code for the Geographical Location
GSASTCOD	Country/State Code
GSACTYCOD	Numeric City Code
GSACNTYCOD	Numeric Country Code
LSTUPD	Record Last Updated Date
CREDATE	Record Creation Date
CANXDATE	Record Cancellation Date
LNAME_GEO	Long Country/State Name
GCINC_GEO	Gaining Combatant Command Associated with Location
STATCOD	Status Code
RECCLASS	Record Security Classification Code
ARMYLOC	Army Location
NOCEAN_GEO	Navy Ocean Area Code
ARMY_GEO_AREA_CD	Army Unique Geographical Location Code
AWIS_DATA_SORC_ID	AGCCS Source Originator Code
COASTLINE_ID_CD	Coastline Identification Code

Table 4-48. (Part 2 of 2)

STANMA	Installation-Station Abbreviated Name
ST_CD	State Code
UTM_GRID_COORD	Geographic Universal Transverse Mercator Grid Coordinates
WORLD_AREA_CODE_ID	Geographic World Area Code Identifier
WTR_AREA_CD	Water Area Code

4.3.2.4 Processing Errors Table. The ERRORS table contains the code and message for each error associated with SORTS processing. This includes both edit and file maintenance errors. The following table identifies the data elements associated with Table 4-49, the ERRORS table.

Table 4-49. Processing Errors
(ERRORS)

Data Element	Element Description
ERR_KEY	Error Code
ERR_MESSAGE	Error Message

4.3.2.5 Distribution Addressee Table. The DISTR_ADDR table contains the pre-update and post-update message addressing requirements for each UIC in the current or last update. This table is deleted and recreated with each update. Pre-update shows the value of zero (0) in the IND field and post-update shows the value of one (1) in this field. Distribution is made based on having a one in the IND field. The following table identifies the data elements associated with Table 4-50, the DISTR_ADDR table.

Table 4-50. Distribution Addressee
(DISTR_ADDR)

Data Element	Element Description
UIC	Unit Identification Code
ADDR	Addressee Unit Identification Code
TYPE	Type of Distribution
IND	Indicator

4.3.2.6 History Retrieval Table. The HISTORY_TABLE table contains information about history retrievals that are to be ran automatically at predetermined intervals. The following table identifies the data elements associated with Table 4-51, the HISTORY_TABLE table.

Table 4-51. History Retrieval
(HISTORY_TABLE)

Data Element	Element Description
HIST_LABEL	Query Name
HIST_TEXT	Text edited by operator
HIST_ACTIVE	Active Flag
HIST_QUERY	SQL Statements
HIST_START_TIME	Query Start Time
HIST_NEXT_TIME	Next Run Time for Query
HIST_INTERVAL	Time between runs

4.3.2.7 STOCK Table. The STOCK table is used to hold the UIC's of units that qualify for the STOCK processing. The following table identifies the elements associated with Table 4-52, the STOCK table.

Table 4-52. STOCK
(STOCK)

Data Element	Element Description
STOCK_UIC	STOCK Unit Identification Code

4.3.2.8 Air Force DOC Identifier Table. The DOCID table associates a DOC code with a mission title and short title. DOCs are mission area assigned to air force organizations. The following table identifies the data element associated with Table 4-53, the DOCID table.

Table 4-53. Air Force DOC Identifier
(DOCID)

Data Element	Element Description
DOCID_KEY	Document Identification Code
CAP	Capability
MISSION	Mission Nomenclature

4.3.2.9 Army Adopted Materiel NSN Item Table. This table provides the national stock numbered (NSN) items that the Army has adopted for its use. The elements and descriptions are listed in Table 4-54.

Table 4-54. Army Adopted Materiel NSN Item (ARMY_ADOPTD_NSN)

Data Element	Element Description
ARMY_ADOPTD_NSN	Army Adopted Materiel Item National Stock Number
ARMY_TYP_DSGNTR	Army Materiel Item Designator
BDGT_ACTVTY_CD	Army Materiel Item Appropriation and Budget Activity Account Code
CNTRLD_INVNTRY_CD	Army Controlled Materiel Item Inventory Code
LOG_CNTRL_CD	Army Materiel Item Logistic Control Code
MTRL_ITEM_RFRN_DOC	Army Materiel Item Reference Document Number
MTRL_ITEM_UNIT_CST	Army Materiel Item Issue Unit Cost In U.S. Dollars and Cents
MTRL_LINE_ITEM_NBR	Army Materiel Line Item Number
MTRL_NSN_DSCRPTN	Materiel Item National Stock Number Description
MTRL_STAT_RCRD_ID	Army Materiel Item Status Committee Record Identifier
MTRL_TYP_CLASSN_CD	Army Materiel Item Life Cycle Status Identification Code
RECORD_CLASSN_CD	Record Security Classification
SPCL_CNTRL_ITEM_CD	Army Special Control Materiel Item Identifier Code
SUPPLY_CLASS_CD	Supply Class Identification Code
SUPPLY_SUBCLASS_CD	Supply Subclass Identification Code
UNIT_OF_ISSUE_CD	Materiel Item Unit-Of-Issue Code

4.3.2.10 Assignment Code Reference Table. This table provides a reference for valid Army unit assignment codes and their associated descriptions. The elements and descriptions are listed in Table 4-55.

Table 4-55. Assignment Code Reference
(ASGMT_CD_REF)

Data Element	Element Description
ASGMT	Unit Assignment Code
ASGMT_CD_DESC	Unit Assignment Code Description
RECORD_CLASSN_CD	Record Classification Code

4.3.2.11 Assignment Code Unit Reference Table. This table associates a valid Army assignment command code with one or more Army units. The elements and descriptions are listed in Table 4-56.

Table 4-56. Assignment Code Unit Reference
(ASGMT_CD_UNIT_REF)

Data Element	Element Description
ASGMT	Unit Assignment Code
RECORD_CLASSN_CD	Security Classification
UIC	Unit Identification Code

4.3.2.12 ASORTS Transaction Error Message Reference Table. This table provides standard error messages for ASORTS applications identified uniquely by an error code. The elements and descriptions are listed in Table 4-57.

Table 4-57. ASORTS Transaction Error Message Reference
(ASORTS_ERR_MSG_REF)

Data Element	Element Description
ASORTS_ERROR_CD	Asorts Error Code
ASORTS_ERROR_MSG	Asorts Transaction Error Message
RECORD_CLASSN_CD	Record Security Classification

4.3.2.13 Unit Status Reporting Cycle Table. This table provides the begin date and end date for the regular monthly unit status reporting cycle. The elements and descriptions are listed in Table 4-58.

4.3.2.14 ASORTS Unit Status Report Status Table. This table provides accounting information for Army units that are required to submit unit status reports (USR). The elements and descriptions are listed in Table 4-59.

Table 4-58. Unit Status Reporting Cycle
(ASORTS_USR_CYCL)

Data Element	Element Description
USR_CYCL_BGN_DT	Unit Status Report Cycle Begin Calendar Date
USR_CYCL_END_DT	Unit Status Report Cycle End Calendar Date
RECORD_CLASSN_CD	Record Classification Code

Table 4-59. ASORTS Unit Status Report Status
(ASORTS_USR_STAT)

Data Element	Element Description
ARMY_STAT_RPT_DT	Unit Army Resources And Training Status Report Date
ARMY_STAT_RPT_TYP	Unit Army Resources And Training Status Report Type Code
RECORD_CLASSN_CD	Record Security Code
UIC	Unit Identification Code
USR_PRCNSG_DT	Unit Status Report Processing Date
USR_PRCNSG_STAT	Unit Status Report Processing Status

4.3.2.15 Attached Command Code Reference Table. This table provides the attach code, the unit it represents (UIC), and a short textual description of the major command that has acknowledged reporting responsibilities for a unit upon transfer. The elements and descriptions are listed in Table 4-60.

4.3.2.16 Branch Series and Service Branch Functional Category Cross Reference Table. This table identifies the branch codes, the corresponding proponent branch series code, and the Army unit type functional category code. Also, provides the description associated with each code. The elements and descriptions are listed in Table 4-61.

4.3.2.17 Component Code-Organization Status Cross Reference Table. This table provides a cross reference table which relates the unit duty status (COMPO) with the organization status code (OESTS). The elements and descriptions are listed in Table 4-62.

Table 4-60. Attached Command Code Reference
(ATACH_CMD_CD_REF)

Data Element	Element Description
ATACH	Organization Attached Command Unit Identification Code
ATACH_CD	Organization Attached Command Code
MAC	Army Major Command Identifier
RECORD_CLASSN_CD	Record Security Code

Table 4-61. Branch Series and Service Branch Functional Category
Cross Reference
(BR_SRS_SRVC_BR_REF)

Data Element	Element Description
BR	UNIT PARENT BRANCH CODE
BR_DSCRPTN	Unit Parent Branch Description
BR_SRS_CD	Proponent Branch Series Code
BR_SRS_TITL	Proponent Branch Series Title
RECORD_CLASSN_CD	Record Security Code
UN_TYP_FNCTNL_CAT	Army Unit Type Functional Category Code
UN_TYP_FNCTNL_DESC	Army Unit Type Functional Category Description

Table 4-62. Component Code-Organization Status Cross Reference
(COMPO_OESTS_XREF)

Data Element	Element Description
COMPO	Unit Duty Status Component Code
COMPO_DESC	Unit Duty Status Component Description
OESTS	Organization Status Code
OESTS_DESC	Organization Status Description
RECORD_CLASSN_CD	Record Security Code

4.3.2.18 Equipment Non-Operationally Ready Reason Reference Table. This table provides a reference for the reasons that a unit's equipment is non_operationally ready. The elements and descriptions are listed in Table 4-63.

4.3.2.19 Army Materiel Line Item Table. This table provides the materiel Items for which the Army has assigned a line item number to identify collectively all national stock numbered (NSN) materiel items possessing the same functional capability. The elements and descriptions are listed in Table 4-64.

4.3.2.20 Reserve Command Assignment Reference Table. This table provides a reference for valid Army Reserve commands to which a US Army reserve unit may be assigned or attached. The elements and descriptions are listed in Table 4-65.

4.3.2.21 Reporting Command Location Reference Table. This table identifies characteristics applicable to a unit that are determined by the unit's location which is used as a reference when assigned PERSINS Processing Activity (PPA), sub-reporter, sub-reporter 2, and zip code values for a reserve component unit

Table 4-63. Equipment Non-Operationally Ready Reason Reference
(EQ_NON_OR_RSN_RFRN)

Data Element	Element Description
EQ_NON_OR_RSN_CD	Unit Reported Critical Equipment Item Non-operationally Ready Reason Code
EQ_NON_OR_RSN_DESC	Unit Reported Critical Equipment Item Non-operationally Ready Reason Description
RECORD_CLASSN_CD	Record Security Code

that has been mobilized. The elements and descriptions are listed in Table 4-66.

Table 4-64. Army Materiel Line Item
(MTRL_LINE_ITEM)

Data Element	Element Description
CMDTY_MGT_CD	Army Materiel Item Commodity Management Code
CMRCL_PRCRMNT_ITEM	Army Materiel End Item Base Level Commercial Procurement Designation Code
CNTRLD_ITEM_CD	Army Materiel Controlled Item Code
MTRL_ITEM_GNRC_NM	Army Materiel Item Generic Name
MTRL_LINE_ITEM_NBR	Army Materiel Line Item Number
MTRL_RTNG_INDR_CD	Materiel Item Routing Identifier Code
RPTBL_ITM_CNTRL_CD	Army Reportable Materiel Item Control Code
SB700_20_CHPTR_NBR	Army Supply Bulletin 700-20 Chapter Number
RECORD_CLASSN_CD	Record Security Code

Table 4-65. Reserve Command Assignment Reference
(RESV_CMD_ASGMT_REF)

Data Element	Element Description
ARGO	Reserve Organization Command Code
ARGO_CD_DESC	Army Reserve Command Assignment Code Description
RECORD_CLASSN_CD	Record Security Code
UIC	Unit Identification Code

Table 4-66. Reporting Command Location Reference
(RPTG_CMD_LOC_REF)

Data Element	Element Description
GEOLOC_CD	Geographic Location Code
APO_WRLD_AREA_CD	Army Post Office World Area Code
PPA	Organization Persins-processing- activity Code
SBRPT	Organization Subordinate Reporting Code
SBRPT2	Organization Alternate Subordinate Reporting Code
ZIP	Standard Zoning Improvement Plan Postal Distribution Area Code
RECORD_CLASSN_CD	Record Security Classification

4.3.2.22 Standard Requirement Code - Unit Type Code Reference Table. This table is used in the unit type code development and unit type characteristics (TUCHA) update transaction process. Standard requirement codes from the Army tables of organization and equipment (TOE) are linked to current and new Army unit type codes for entry in the JCS TUCHA reference file. The elements and descriptions are listed in Table 4-67.

4.3.2.23 Table Of Distribution And Allowances Unit Activity Code - Unit Type Code Cross Reference Table. This table Provides a cross reference for a TDA unit's activity code, which is position 3 and 4 of a TDA unit's troop program sequence number (TPSN) and the TDA unit's unit type code (UTC). The elements and descriptions are listed in Table 4-68.

Table 4-67. Standard Requirement Code - Unit Type Code Reference
(SRC.UTC_XREF)

Data Element	Element Description
SRC	Unit Standard Requirement Code
BR	Unit Parent Branch Code
RECORD_CLASSN_CD	Record Security Code
TOE_REQD_PERSL_QTY	Table Of Organization And Equipment Required Personnel Total Quantity
TOE_SHORT_TITLE	Table Of Organization And Equipment Short Title
TOE_STAT_CD	Table Of Organization And Equipment Status Code
ULC	Unit Level Code
UTC	Unit Type Code

Table 4-68. Table Of Distribution And Allowances Unit Activity
Code - Unit Type Code Cross Reference
(TDA_TPSN.UTC_XREF)

Data Element	Element Description
TDA_UNIT_ACTVTY_CD	Unit Activity Code
RECORD_CLASSN_CD	Record Security Code
UTC	Unit Type Code

4.3.2.24 Unit Alternate Sub-Reporter Table. This table provides alternate sub-reporters which are units designated by the major command as alternates to a unit's primary sub-reporter with responsibility for submitting status reports for the unit to the unit's reporting organization. The elements and descriptions are listed in Table 4-69.

4.3.2.25 ASORTS Report Control Number Log Table. This table contains report control information for all in-coming and outgoing Status of Resources and Training reports for a specific subordinate unit/organization that are processed by a higher level organization. The elements and descriptions are listed in Table 4-70.

4.3.2.26 Airfield Main Table. This reference table contains government and commercial airport runway information for selected geographical locations. The elements and descriptions are listed in Table 4-71.

Table 4-69. Unit Alternate Sub-Reporter
(UNIT_ALTN_SUBRPTR)

Data Element	Element Description
ALTN_SBRPT	Organization Alternate Subordinate Reporting Organization Code
RECORD_CLASSN_CD	Record Security Code
REPORTING_PRIORITY	Standard Reporting Priority Identifier
UIC	Unit Identification Code

Table 4-70. ASORTS Report Control Number Log
(ASORTS_RPT_NBR_LOG)

Data Element	Element Description
EXTRNL_ORG_UIC	ASORTS Report External Organization Unit Identification Code
RPT_PRCNSG_ORG_UIC	ASORTS Report Processing Organization Unit Identification Code
CNTNT_IND_CD	ASORTS Transaction Report Content Indicator Code
INCMNG_PRCNSG_DTT	ASORTS Incoming Report processing Date-Time
INCMNG_RPT_DTG	Incoming Report Date-Time-Group
INCMNG_RPT_NBR	ASORTS Transaction Incoming Report Number
OUTGNG_PRCNSG_DTT	ASORTS Outgoing Report Processing Date-Time
OUTGNG_RPT_COM_DTG	ASORTS Outgoing Report Communication System Date-Time- Group
OUTGNG_RPT_DTG	ASORTS Outgoing Report Date-Time- Group
OUTGNG_RPT_NBR	ASORTS Transaction Outgoing Report Number
RECORD_CLASSN_CD	Record Security Classification

Table 4-71. Airfield Main Table (APORTS)
(Part 1 of 2)

Data Element	Element Description
GEOCOD	Geographical Location Code
RECCLASS	Security Classification Code
CREDATE	APORTS Record Creation Date
LSTUPD	APORTS Last Updated Date
ARFIFCC	Airfield Geolocation Country Code
BENUM	World Area Code and Installation Number
RUNLGTH	Primary Runway Length
ICAOCOD	International Civil Aviation Organization Code
AFLDSTAT	Airfield Operation Authority Code
LDCLASS	Load/Unload Classification Number

Table 4-71. (Part 2 of 2)

IARNEP	IFR Maximum Hourly Arrivals Without Departures
IDEPNAR	IFR Maximum Hourly Departures Without Arrivals
IARDEP	IFR Maximum Hourly Departures When Maximum Arrivals Occur
VARNDEP	VFR Maximum Hourly Arrivals Without Departures
VDEPNAR	VFR Maximum Hourly Departures Without Arrivals
TOTPARK	Aircraft Loading Parking Area Code
GEOLOC	Geographical Location Country Code
PRK5	C5 Aircraft Load/Unload Parking Capacity Number
PRKC141	C141 Aircraft Load/Unload Parking Capacity Number
PRKC130	C130 Aircraft Load/Unload Parking Capacity Number
PRKKC10	KC10 Aircraft Load/Unload Parking Capacity Number
PRKKC135	KC135 Aircraft Load/Unload Parking Capacity Number
PRK747	747 Aircraft Load/Unload Parking Capacity Number
PRKB52	B52 Aircraft Load/Unload Parking Capacity Number
CGOC5	Daily Arrival C5 Aircraft Short Ton Cargo Unload Capability
CGOC141	Daily Arrival C141 Aircraft Short Ton Cargo Unload Capability
CGOC130	Daily Arrival C130 Aircraft Short Ton Cargo Unload Capability
CGOKC10	Daily Arrival KC10 Aircraft Short Ton Cargo Unload Capability
CGOKC135	Daily Arrival KC135 Aircraft Short Ton Cargo Unload Capability
CGOLRWC	Daily Arrival Long Range Wide Body Aircraft Short Ton Cargo Unload Capability

CGORECP	Lowest Aircraft Type Reception Code
PASNGER	Passenger Arrival Capacity
CGOTHRU	Daily Short Ton Cargo Received/Discharge/Cleared Capability
PASSTHRU	Daily Passengers Received/Discharge/Cleared Capability
UIC	Unit Identification Code
PRIORFLG	Airfield Priority Flag

4.3.2.27 Aircraft Parking Area Table. This reference table contains government and commercial aircraft parking area information for selected geographical locations. The elements and descriptions are listed in Table 4-72.

Table 4-72. Aircraft Parking Area Table
(APRON)

Data Element	Element Description
GEOCOD	Geographical Location Code
APIDENT	Aircraft Parking Area Identifier
APNUM	Same Aircraft Parking Area Type Count
APNAME	Aircraft Parking Area Usage
APDIM	Aircraft Parking Area Dimension
APSFC	Aircraft Parking Area Surface Code
APCOND	Aircraft Parking Area Condition Code
APTYPE	Aircraft Parking Area Type Code
APCAP	Maximum Aircraft Parking Area Capability Code
APWIDTH	Aircraft Parking Area Access Width
APAREA	Aircraft Parking Square Feet Dimensions
RECCLASS	Security Classification
LSTUPD	APORTS Last Updated Date
APUSER	Aircraft Parking Area Assigned Operational Plan Force

4.3.2.28 Aircraft Parking Condition Table. This reference table contains government and commercial aircraft parking condition information for selected geographical locations. The elements and descriptions are listed in Table 4-73.

Table 4-73. Aircraft Parking Condition Table
(APCONDITION)

Data Element	Element Description
APCOND	Aircraft Parking Condition Code
DEFINITION	Aircraft Parking Condition Plain Language Description

4.3.2.29 Aircraft Parking Surface Table. This reference table contains government and commercial aircraft parking surface information for selected geographical locations. The elements and descriptions are listed in Table 4-74.

Table 4-74. Aircraft Parking Surface Table
(APSURFACE)

Data Element	Element Description
APSFC	Aircraft Parking Surface Code
DEFINITION	Aircraft Parking Surface Plain Language Description

4.3.2.30 Aircraft Parking Type Table. This reference table contains government and commercial aircraft parking type information for selected geographical locations. The elements and descriptions are listed in Table 4-75.

Table 4-75. Aircraft Parking Type Table
(APTYPE)

Data Element	Element Description
APTYPE	Aircraft Parking Type Code
NAME	Usage Type Category
DEFINITION	Aircraft Parking Type Plain Language Description

4.3.2.31 Aircraft Parking Remark Table. This reference table contains government and commercial aircraft parking remarks for selected geographical locations. The elements and descriptions are listed in Table 4-76.

Table 4-76. Aircraft Parking Remarks Table
(AREMARKS)

Data Element	Element Description
GEOCOD	Geographical Location Code
REMNUM	Remark Count
RECCLASS	Security Classification Code
REMDATE	Remark Date
COMMENTS	Supplementary Information

4.3.2.32 Airfield Clearance Table. This reference table contains government and commercial airfield clearance information for selected geographical locations. The elements and descriptions are listed in Table 4-77.

Table 4-77. Airfield Clearance Table
(CLEARANCE)

Data Element	Element Description
GEOCOD	Geographical Location Code
RECCLASS	Security Classification Code
LSTUPD	CLEARANCE Last Update Date
OUIC	Originating Unit Identification Code
RDMODE	Road Clearance Mode Code
CGORDCLR	Daily Road Short Ton Cargo Discharge Capability Count
PASSRDCLR	Daily Road Passengers Discharge Capability Count
TRMODE	Train Clearance Code
CGOTRCLR	Daily Train Short Ton Cargo Discharge Capability Count
PASSTRCLR	Daily Train Passenger Discharge Capability Count
WATERMODE	Water Clearance Mode Code
CGOWACLR	Daily Water Short Ton Cargo Discharge Capability Count
PASSWACLR	Daily Water Passenger Discharge Capability Count

4.3.2.33 Airfield Discharge Table. This reference table contains information on the amount of cargo and passengers that can be stored and cleared through government and commercial airfields. The elements and descriptions are listed in Table 4-78, the Discharge Table.

Table 4-78. Airfield Discharge Table
(DISCHARGE)

Data Element	Element Description
GEOCOD	Geographical Location Code
RECCLASS	Security Classification Code
LSTUPD	DISCHARGE Last Update Date
OUIC	Originating Unit Identification Code
CGOBULK	Short Ton Bulk Cargo Processed Count
CGOOVER	Short Ton Oversized Cargo Processed Count
CGOOUT	Short Ton Outsized Cargo Processed Count
PASNGER	Passengers Processed Count
COVSTOR	Covered Storage Area Count
IMPSTOR	Uncovered Paved Storage Area Count
UNIMPSTOR	Uncovered Unpaved Storage Area Count

4.3.2.34 Army Totals Table. This reference table contains unique United States Army summary information for effective military service management. The elements and descriptions are listed in Table 4-79.

Table 4-79. Army Totals Table
(ARMYTOTALS)
(Part 1 of 5)

Data Element	Element Description
UIC	Unit Identification Code
MDATE	Scheduled Mobilization Period
MBDATE	Scheduled Mobilization Date
RICDA	As Of Category Level Change Date
PICDA_AC	Officer Strength Information Change Date

Table 4-79.(Part 2 of 5)

PICDA_AE	Enlisted Strength Information Change Date
PICDA_CS	Civilian Strength Information Change Date
PICDA_AW	Warrant Officer Strength Information Change Date
PAOD	Planned Action Date
ASGMT	Unit Assignment Code
MBCMB	Mobilization Command Unit Identification Code
RPTOR	Reporting Organization Unit Identification Code
OPCON	Operational Control Unit Identification Code
ADCON	Administrative Control Unit Identification Code
ATCOM	Attached Command Unit Identification Code
MJCOM	Major Command Unit Identification Code
GCMD	Gaining Command Unit Identification Code
MAC	Major Army Command
PERS	Total Authorized Wartime Strength
PERSO	Officer Authorized Wartime Strength
PERSW	Warrant Officer Authorized Wartime Strength
PERSE	Enlisted Authorized Wartime Strength

4.3.2.35 Army Unique Data Table. The Army Unique Data Table provides an alternate view of the merged unit unique supplemental data that is normally not visible by the joint community. The requirement was established by the U. S. Special Operations Command, USSOCOM, for access to the information. The source of data is HQ Army and it is loaded only on the USSOCOM, NMCC, and Army CINC GCCS sites. This reference table elements and descriptions are listed in Table 4-80.

4.3.2.36 Army Geographical Table. The Army Geographical Table contains supplemental references unique to the Geographical Location Table. The elements and descriptions are listed in Table 4-81, the ARMYGEO table.

4.3.2.37 Army Guard Unique Remarks Table. This reference table contains unique remarks applicable to U. S. Army Guard units, that is normally not visible by the joint community. The requirement was established by the U. S. Special Operations Command, USSOCOM, for access to the information. The source of data is HQ Army and it is loaded only on the USSOCOM, NMCC, and Army CINC GCCS sites. The elements and descriptions are listed in Table 4-82.

4.3.2.38 Army Reserves Unique Remarks Table. This reference table contains unique remarks applicable to U. S. Army Reserves units, that is normally not visible by the joint community. The requirement was established by the U. S. Special Operations Command, USSOCOM, for access to the information. The source of data is HQ Army and it is loaded only on the USSOCOM, NMCC, and Army CINC GCCS sites. The VMENT table elements and descriptions are listed in Table 4-83.

Table 4-80. Army Unique Table
(ARMYUNIQUE)
(Part 1 of 4)

Data Element	Element Description
UIC	Unit Identification Code
ANAME	Abbreviated Organization Name
COMP	Unit Duty Component Code
SRC	Unit Standard Requirement Code
TPSN	Unit Troop Program Sequence Number

CARGOLGTH	Cargo Length in Inches Per Item
CARGOWDTH	Cargo Width in Inches Per Item
CARGOHGHT	Cargo Height in Inches Per Item
CARGOFT	Square Feet Floor/Deck Area Per Item Amount
QUANTITY	Cargo Equipment Count
CARGOWTST	Cargo Short Ton Weight Amount
CARGOWTMT	Cargo Cube Measurement Amount

4.3.2.45 Ports Data Table. The Ports table is the primary reference table where ships may load and unload cargo. The table identifies the number of harbors, wharves, and berthing facilities available at a given location. This reference table elements and descriptions are listed in Table 4-90.

4.3.2.46 Berth Classification Table. The Berth Classification Table describes the space allocated to a vessel at a wharf. Berth descriptions are listed in Table 4-91, the PORTBERTHS.

Table 4-90. Ports Data Table
(PORTS)
(Part 1 of 2)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
HARBORNUM	Harbor Number
HARBCOD	Harbor Code
HARBTYPER	Physical Harbor
WHARFCOD	Wharf Code
WHARFNUM	Wharf Number
REMIID	Remark Record Value Code
REMIUM	Remarks Data Number
RECTYPER	Type Of Data Being Defined
CREDATE	Record Creation Date
LSTUPD	Record Last Updated Date
RECCLASS	Security Classification
NAME	Name Of The Port/Harbor/Wharf
MILSTAMP	Water Ports Transportation Code
DMACHART	Port DMA Chart Amount
BENUM	Port BE Number
CATEGORY	Port Category Codes
DMANDX	Number That DMA Assigns To Each Port
GEOLOC	Port Geographical Location Code
AIRFIELD	Airfield Geolocation Code Nearest to Seaport
DISTANCE	Distance Of Airfield From Seaport
CLASS_S	Number Of Super Tanker Anchorage Berths
CLASS_I	Number Of Class I Anchorage Berths
CLASS_II	Number Of Class II Anchorage Berths

CLASS_III	Number Of Class III Anchorage Berths
CHANNELS	Number Of Navigable Channels Allowing Maritime Or Coaster Traffic
WHARFLGTH	Berthing Length In Feet
WHARFDPTH	Minimum Depth At Chart Datum
WHARFAPRON	Apron Width In Feet
WHARFALT	Alternate Berth Use Codes
RECSEQ	Unique Number Used To Link Records Together

Table 4-91. Berth Classification Table
(PORTBERTHS)
(Part 1 of 2)

Data Element	Element Description
GEO_KEY	Port Geographical Location Code
TOTLNGTHSRC	Machine Generated Or Analyst Input Berth Length
TOTLLNGTH	Berthing Length
TOTDEPTH16	Berthing Lengths Greater Than 16 Feet
TOTDEPTH26	Berthing Lengths Greater Than 26 Feet
TOTDEPTH33	Berthing Lengths Greater Than 33 Feet
TOTDEPTH39	Berthing Lengths Greater Than 39 Feet
TOTDEPTH46	Berthing Lengths Greater Than 46 Feet
BERTHNUM	Number Of Berths Of A Particular Classification
BERTHCLASS	Berth Classification
MAXLGBBLK	Length Of Largest Breakbulk
MINDPBBLK	Minimum Depth At Chart Datum
MAXLGCNTR	Length of Largest Container Berth
MINDPCNTR	Minimum Depth At Chart Datum
MAXLGRORO	Length Of Largest RO/RO
MINDPRORO	Minimum Depth At Chart Datum
MAXLGPOL	Length Of Largest Tanker

Table 4-91. (Part 2 of 2)

MINDPPOL	Minimum Depth At Chart Datum
RAMPS	Number Of RO/RO Ramps

4.3.2.47 Port Inland Waterways Clearance Data Table. The PORTCLEARANCE table, Table 4-92, is a supplemental reference table associated with all geographical ports. The table elements describe the traffic capacity for this seaport to handle cargo with trains, trucks, sea barges, and/or through pipelines.

4.3.2.48 Craft Availability at Port Data Table. Table 4-93, the Craft Availability at Port Table contains information on vessel and equipment availability used to load and unload cargo and assisted in docking and towing large sea crafts. The PORTCRAFT table elements and descriptions are listed in Table 4-93.

Table 4-92. Port Inland Waterways Clearance Data Table (PORTCLEARANCE)

Data Element	Element Description
GEO_KEY	Port/Harbor/Wharf Geolocation Code
RAIL	Indicates If Port Has Rail Clearance
RAILTRK	Number Of Rail Tracks
RAILGAGE	Width Between Rails
RAILCAP	Cargo Clearance Capacity Over Selected Tracks
ROAD	Indicates If Port Has Road Clearance
ROADNUM	Number Of Roads
ROADCAP	Cargo Clearance Capacity For A 24 Hour Period
PIPELINE	Indicates If Port Has Pipeline Clearance
PIPENUM	Number Of Pipelines
PIPECAP	POL Clearance Capacity Via Pipelines
INLWATER	Indicates If Port Has Inland Waterway Clearance
INLWWCAP	Inland Waterway Cargo Capacity
RECSEQ	Unique Number To Link Records Together

Table 4-93. Craft Availability At Port Data Table
(PORTCRAFT)
(Part 1 of 2)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
TUGS	Tugboats Count
TUGSHIP	Most Powerful Tugboat Horsepower Amount
BBLK	Number Of Lighters Capable Of Handling Dry Military Cargo
POLNUM	Number Of Lighters Used To Carry POL
POLCAP	Total Capacity Of POL Lighters

Table 4-93. (Part 2 of 2)

WATERNUM	Number of Lighters Used To Carry Water
DREDGERS	Total Number Of Dredgers
MISC	Harbor Craft Not In Other Data
CRANEFLT	Number Of Cranes
CRANECAP	Maximum Lift Capacity Of Defined Crane
REPWEIGHT	Largest Vessel Measured By Dead Weight
RECSEQ	Unique Number To Link Records Together

4.3.2.49 Port Capacity For Military Cargo Table. The Port Capacity For Military Cargo Table contains facilities and equipment information to support off-load and movement of military cargo. Table 4-94 lists the table elements and descriptions associated with the PORTSDISCHARGE table.

4.3.2.50 Port Equipment Availability Classification Table. This reference table contains available equipment categorical information at a port. The PORTEQPT table elements and descriptions are listed in Table 4-95.

4.3.2.51 Port Review Table. The PORTREVIEW table identifies the month and year the port capacity and load requirement information was analyzed. Table 4-96 list the Port Review table elements and descriptions.

Table 4-94. Port Capacity For Military Cargo Table
(PORTDISCHARGE)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
THRUPUTSRC	Machine Generated Or Analyst Input Throughput Capacity
THRUPUTSTON	Port Throughput Capacity In Short Tons
THRUPUTMTON	Port Throughput Capacity In Measurement Tons
DISCCAPSRC	Machine Generated Or Analyst Input Discharge Capacity
DISCCAPSTON	Discharge Capacity In Short Tons
DISCCAPMTON	Discharge Capacity In Measurement Tons
BBLKSRCE	Machine Generated Or Analyst Input Break Bulk Discharge Capacity
BBLKSTON	Break Bulk Discharge Capacity In Short Tons
BBLKMTON	Break Bulk Discharge Capacity In Measurement Tons
CNTRSRC	Machine Generated Or Analyst Input Container Capacity
CNTRSTON	Container Discharge Capacity In Short Tons
CNTRMTON	Container Discharge Capacity In Measurement Tons
ROROSRC	Machine Generated Or Analyst Input Roll On/Roll Off Container Capacity
ROROFT	Amount of Roll On/Roll Off Cargo
ROROSTON	Roll On/Roll Off Discharge Capacity In Short Tons
ROROMTON	Roll On/Roll Off Discharge Capacity In Measurement Tons
RECSEQ	Unique Number Used To Link Records Together

4.3.2.52 Port Status Table. The PORTSTATS table contains the port specific information that allow vessels assigned, bound, or departing to navigate within a port. PORTSTATS, Table 4-97, elements and descriptions are listed below.

4.3.2.53 Port Storage Availability Table. The Ports Storage table contains import and export information for cargo holding areas. Table 4-98 contains table elements and descriptions in the PORTSTORAGE table.

4.3.2.54 Port Utilities Table. The PORTUTILITIES table contains ship support facilities information and table elements are listed in Table 4-99.

Table 4-95. Port Equipment Availability Classification Table
(PORTEQPT)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
CRANES	Crane Count
CRTYPE	Crane Type
CRCAP	Crane Capacity
MECHANICAL	Mechanical Handling Equipment Amount
MECHTYPE	Mechanical Handling Equipment Type
MECHCAP	Mechanical Handling Equipment Capacity
OTHEREQPT1	Equipment Other Than Cranes Comment One
OTHEREQPT2	Equipment Other Than Cranes Comment Two
OTHEREQPT3	Equipment Other Than Cranes Comment Three
OTHEREQPT4	Equipment Other Than Cranes Comment Four
OTHEREQPT5	Equipment Other Than Cranes Comment Five
OTHEREQPT6	Equipment Other Than Cranes Comment Six
RECSEQ	Record Sequence Number

Table 4-96. Port Review Table
(PORTREVIEW)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
REVYR	Analyst Review Year
REVM	Analyst Review Month
REYRCAP	Reviewed Capacity Data Year
REVMCAP	Reviewed Capacity Data Month
ADEQUACY	Information Adequacy Indicator
RECSEQ	Record Sequence Number

Table 4-97. Port Status Table
(PORTSTATS)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
PROTECTION	Anchorage Area Protection Code
HOLDGRND	Anchorage Area Holding Ground
CHANNAME	Channel/Approach Name
CHANLNGTH	Channel Length
CHANWDTH	Channel Navigable Width Code
CHANDPTH	Channel Depth Datum Chart Code
OHCLEAR	HWS Least Overhead Clearance
ICEFORM	Ice Forms Month
ICEBRKUP	Ice Breaks Month
TIDERISE	Tidal Rise Indicator
PERCNTUSE	Time Wharves Used Amount
SWELLFT	Harbor Swell Predominate Height
TURNDIAM	Largest Turning Basin Diameter
TURNDPTH	Depth Of Water At Chart Datum
RECSEQ	Record Sequence Number

Table 4-98. Port Storage Availability Table
(PORTSTORAGE)
(Part 1 of 3)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
OPENSRC	Open Storage Area Availability Input Flag
TOTOPENFT	Harbor Open Cargo Storage Area
BBLKSRC	Breakbulk Open Storage Area Input Flag
BBLKFT	Breakbulk Cargo Open Storage Area

Table 4-98. (Part 2 of 3)

BBLKSTON	Breakbulk Cargo Storage Availability in Short Tons
BBLKMTON	Breakbulk Cargo Storage Measurements Availability
CNTRSRC	Container Storage Area Availability
CNTRFT	Largest Container Berth Length
CNTRSTON	Cargo Container Storage Capacity
CNTRMTON	Stored Cargo Container Amount
ROROSRC	Machine Generated/ Analyst Input RO/RO Storage Area Available
ROROFT	Minimum Depth At Chart Datum
ROROSTON	Amount of RO/RO That Can Be Stored
ROROMTON	Amount of RO/RO That Can Be Stored
DRYSRC	Machine Generated Or Analyst Input Dry Bulk Storage Area Available
DRYFT	Open Storage Area For Drybulk Cargo
COVSR	Machine Generated Or Analyst Input Covered Storage Area Available
COVFT	Covered Storage Area For Breakbulk Storage
COLDFT	Cold Storage Capacity
AMMOFT	Ammunition Storage Capacity
WATER	Water Storage Capacity
CNTRSTUFF	Area Designated for Stuffing/Unstuffing Of Containers
POLSRC	Machine Generated Or Analyst Input POL Storage Area Available
POLBBL	Refined POL Products and Crude Oil Capacity
CRDPOLSRC	Machine Generated or Analyst Input Crude POL Storage Area Available
CRDPOLBBL	Crude Oil Storage Capacity
REPOLSRC	Machine Generated Or Analyst Input Refined POL Storage Available
REPOLBBL	Refined POL Storage Capacity
BBLKOPENFT	Open Storage Area For Break Bulk Cargo

Table 4-98. (Part 3 of 3)

CNTROPENSRC	Machine Generated Or Analyst Input Container
	Open Storage Available
CNTROPENFT	Container Cargo Open Storage Area
ROROPENFT	RO/RO Cargo Open Storage Area
DRYOPENFT	Drybulk Cargo Open Storage Area
CNTRSTACK	Stacked Containers Height
CNTRFACTR	Percentage of Storage Area Used To Hold Containers

Table 4-99. Port Utilities Totals Table

(PORTUTILITIES)

Data Element	Element Description
GEO_KEY	Port/Harbor/Wharf Geolocation Code
ELECTRIC	Electricity Availability
WATER	Water Availability
BUNKER	Bunker Availability
CNTRREFER	Containers Kept Refrigerated Amount
RECSEQ	Record Sequence Number

4.3.2.55 Port Remarks Table. The PREMARKS table contains comments that support other tables which store ports data information. Table 4-100 lists PREMARKS table elements and descriptions.

Table 4-100. Ports Remarks Table

(PREMARKS)

Data Element	Element Description
GEO_KEY	Port Geolocation Code
HARBORNUM	Harbor Number
WHARFNUM	Wharf Number
RE MID	Remark Record Value Code
REMNUM	Remarks Data Number
RECTYPE	Type Of Data Being Defined
COMMENTS	Comments From Other Port Tables
RECSEQ	Record Sequence Number

4.3.3 Validation Tables. This paragraph describes the SORTS Modernization joint and service validation tables. These tables will be used to validate SORTS data before it is placed in the database. The validation tables are relatively small in size and contain a 1- to 3-character code and related code name.

4.3.3.1 Current Status and Activity Code Table. The ACTIV table contains valid two-character activity codes and related names. The following table identifies the data elements associated with Table 4-101, the ACTIV table.

Table 4-101. Current Status and Activity Code
(ACTIV)

Data Element	Element Description
ACTIV_KEY	Status and Activity Code
NAME_ACTIV	Activity Code Description

4.3.3.2 Country of Affiliation Table. The COAFF table contains valid two-character country codes. The following table identifies the data element associated with Table 4-102, the COAFF table.

Table 4-102. Country of Affiliation
(COAFF)

Data Element	Element Description
COAFF_KEY	Country of Affiliation Code

4.3.3.3 Country/State Code Table. The CRTCD table contains 2-character country/state codes and the associated name of the country or state. The following table identifies the data elements associated with Table 4-103, the CRTCD table.

Table 4-103. Country/State Code
(CRTCD)

Data Element	Element Description
CRTCD_KEY	Country/State Code
SNAME_CRTCD	Short Country/State Name
LNAME_CRTCD	Long Country/State Name

4.3.3.4 CINC/Service Component Table. The CSCOM table, Table 4-104 provides the service components that are associated with a CINC. The CSCOM_KEY is comprised of the 6-character UIC for the

CINC plus the letter representing the service. The FUNC_CSCOM column contains the UIC for that component. The following table identifies the data elements associated with the CSCOM table.

4.3.3.5 CINC Service Command Validation Table. The CSERV table, Table 4-105 contains valid command codes and related descriptions for all CINCs and services. The following table identifies the data elements associated with the CSERV table.

Table 4-104. CINC/Service Component
(CSCOM)

Data Element	Element Description
CSCOM_KEY	CINC/Service Component
FUNC_CSCOM	Component Unit Identification Code

Table 4-105. CINC Service Command
(CSERV)

Data Element	Element Description
CSERV_KEY	CINC/Service Command Code
NAME_CSERV	CINC/Service Command Code Description
UIC_CSERV	CINC/Service Command Unit Identification Code

4.3.3.6 Major Equipment-Reconnaissance Capabilities Table. The MEREC table contains valid codes for the Major Equipment and Reconnaissance Capabilities. The following table identifies the data elements associated with Table 4-106, the MEREC table.

Table 4-106. Major Equipment-Reconnaissance Capabilities
(MEREC)

Data Element	Element Description
MEREC_KEY	Major Equipment-Reconnaissance Capabilities Code
NAME_MEREC	Description

4.3.3.7 Major Command Codes Table. The MJCC table contains a cross reference for major command codes and the associated Unit Identification Codes. The following table identifies the data elements associated with Table 4-107, the MJCC table.

Table 4-107. Major Command Codes
(MJCC)

Data Element	Element Description
MJCC3_KEY	Major Command Code
MJCC6_KEY	Major Command Unit Identification Code

4.3.3.8 Major Command Name Table. The MJCC0 table, Table 4-108 contains the major command codes and associated major command names. The following table identifies the data elements associated with the MJCC0 table.

Table 4-108. Major Command Name
(MJCC0)

Data Element	Element Description
MJCC0_KEY	Major Command Code
FUNC_MJCC0	Major Command Name

4.3.3.9 Navy Ocean Table. The NOCEAN table contains the last two digits of valid location codes for water areas and the long name for that area. The following table identifies the data elements associated with Table 4-109, the NOCEAN table.

Table 4-109. Navy Ocean (NOCEAN)

Data Element	Element Description
NOCEAN_KEY	Ocean Code
NAME_NOCEAN	Ocean Area Name

4.3.3.10 Prime Equipment Operational Status Table. The PEQS table contains valid codes for the operational status of specifically designed major equipment. The following table identifies the element associated with Table 4-110 the PEQS table.

Table 4-110. Prime Equipment Operational Status
(PEQS)

Data Element	Element Description
PEQS_KEY	Prime Equipment Operational Status Code
DEFINITION	Code Description

4.3.3.11 Plan Identification Validation Table. The PID table contains valid entries for the first character of the element PID. The following table identifies the element associated with Table 4-111 the PID table.

4.3.3.12 Primary Mission Area Table. The PRMA table contains valid primary mission area codes. The following table identifies the element that is associated with Table 4-112, the PRMA table.

Table 4-111. Plan Identification Validation
(PID)

Data Element	Element Description
PID_KEY	Plan Identification Key

Table 4-112. Primary Mission Area
(PRMA)

Data Element	Element Description
PRMA	Primary Mission Area Code
DESCRIPTION	Description of Code
TYPE	Type of Mission Area

4.3.3.13 Reason Code Table. The REASN table contains codes that indicate the reason why the overall unit posture is not C-1. The following table identifies the element associated with Table 4-113 the REASN table.

Table 4-113. Reason Code (REASN)

Data Element	Element Description
REASN_KEY	Reason Code
DESCRIPTION	Reason Definition

4.3.3.14 Reporting Organization/CINC Table. The RPTCN table provides a cross-reference of reporting organization UIC's and the UIC of the associated CINC. The following table identifies the elements associated with Table 4-114, the RPTCN table.

4.3.3.15 Type of Personnel Table. The TPRES table contains codes representing the type of personnel being reported. The following table identifies the elements associated with Table 4-115, the TPRES table.

Table 4-114. Reporting Organization/CINC (RPTCN)

Data Element	Element Description
RPTCN_KEY	Reporting Organization Unit Identification Code
FUNC_RPTCN	CINC Unit Identification Code

Table 4-115. Type of Personnel (TPERS)

Data Element	Element Description
TPERS_KEY	Type of Personnel Code
NAME_TPERS	Description of Personnel Code

4.3.3.16 Type of Report Table. The TREAD table contains codes that indicate the type of report being reported by the organization. The following table identifies the element associated with Table 4-116, the TREAD table.

Table 4-116. Type of Report (TREAD)

Data Element	Element Description
TREAD_KEY	Type of Report Code
DEFINITION	Code Description

4.3.3.17 Unit Level Validation Table. The ULC table contains valid three-character unit codes and related code descriptions. The following table identifies the data element associated with Table 4-117, the ULC table.

Table 4-117. Unit Level (ULC)

Data Element	Element Description
ULC_KEY	Unit Level Code
DEFINITION	Code Description

4.3.3.18 Unit Descriptor Code Two-to-Three Table. The UNDC table contains the expanded 3-character UDC code. UDC is reported as a 1-character code. This code is used with the character reported in REVAL to create a 2-character code that is used to derive the 3-character UDC that is stored in the

database. The following table identifies the elements associated with Table 4-118, the UNDC table.

Table 4-118. Unit Descriptor Code Two-to-Three (UNDC)

Data Element	Element Description
UNDC2_KEY	Two-character UDC and REVAL
UNDC3_KEY	Expanded Unit Descriptor Code

4.3.3.19 Unit Descriptor Code Three-to-One Table. The UNDC4 table provides a conversion from the 3-character UDC stored in the database to the 1-character UDC reported in the input transaction. The following table identifies the elements associated with Table 4-119, the UNCD4 table.

Table 4-119. Unit Descriptor Code Three-to-One (UNDC4)

Data Element	Element Description
UNDC4_KEY	3-character UDC
FUNC_UNDC4	1-character UDC

4.3.3.20 Fleet Table. This table contains the valid 1-character fleet codes for Navy units. The following table identifies the elements associated with Table 4-120, the FLT table.

Table 4-120. Fleet (FLT)

Data Element	Element Description
FLT	Valid Fleet Code
DESCRIPTION	Description of Code

4.3.3.21 Reason Code Table. This table contains characters 2 and 3 of Navy reason codes and a brief description of the codes. The following table identifies the elements associated with Table 4-121, the SORTS_VAL_RES_AREA_REASONS table.

Table 4-121. Reason Code (SORTS_VAL_RES_AREA_REASONS)

Data Element	Element Description
AREA	Character 2 of Reason Code
CODE	Character 3 of Reason Code
SHORT_DESCRIPTION	Short Description of Code

4.3.3.22 Types Code Table. This table contains characters 1 and 2 of Navy reason codes and a description of the codes. The following table identifies the elements associated with Table 4-122 the SORTS_VAL_RES_AREA_TYPES table.

Table 4-122. Types Code
(SORTS_VAL_RES_AREA_TYPES)

Data Element	Element Description
AREA	Character 1 of Reason Code
CODE	Character 2 of Reason Code
DESCRIPTION	Description of Code

4.3.3.23 Special Capability Code Table. This table contains valid special capability codes and a description of each code. The following table identifies the elements associated with Table 4-123, the SPCAP table.

Table 4-123. Special Capability Code
(SPCAP)

Data Element	Element Description
SPCAP	Special Capability Code
DESCRIPTION	Description of Code

4.3.3.24 Type of Command Table. This table contains valid codes for type of command and a description of each. The following table identifies the elements associated Table 4-124, with the TYCOM table.

Table 4-124. Type of Command (TYCOM)

Data Element	Element Description
TYCOM	Type of Command Code
DESCRIPTION	Description of Code
UIC	Unit Identification Code

4.3.3.25 Assignment Major Command Validation Table. This table contains the registration reference data for unit assignment code (ASGMT), organization major command code (MJCOM), and the Army major command identifier (MAC). Table 4-125, the ASGMT_MJCOM_VLDTN table will be used during the Army unit registration process.

4.3.3.26 Status Code/Assignment Validation Table. This table validates the unit assignment code (ASGMT), the organization

Table 4-125. Assignment Major Command Validation
(ASGMT_MJCOM_VLDTN)

Data Element	Element Description
ASGMT	Unit Assignment Code
ORIGINATOR_UIC	Unit Originator Code
MAC	Army Major Command Identifier
MJCOM	Organization Major Command Unit Identification Code
RECORD_CLASSN_CD	Record Security Classification

personnel readiness status code (STATC), and the first two characters of the unit troop program sequence basic number (TPSN). Table 4-126, the STATC_ASGMT_VLDTN table is used during the Army unit registration process.

Table 4-126. Status Code/Assignment Validation
(STATC_ASGMT_VLDTN)

Data Element	Element Description
ASGMT	Unit Assignment Code
STATC	Organization Personnel Readiness Status Code
TPSN_1_2_VLDTN_CD	Unit Troop Program Sequence Basic Number Position 1 And 2 Validation Code
RECORD_CLASSN_CD	Record Security Classification

4.3.3.27 Unit Descriptor Code Table. The UDC table provides contains 3-character code and its definition used to validate the Unit Descriptor Code entry reported from the BIDE set. Table 4-127 listed the elements within the UDC table.

Table 4-127. Unit Descriptor Code Table
(UDC)

Data Element	Element Description
UDC_KEY	Unit Descriptor Code
DEFINITION	Code Description

4.3.3.28 Troop Program Sequence Number Table. The TPSN table validates unit troop numbers into the SORTS database from USMTF messages and reports. Table 4-128 listed the elements within the TPSN table.

4.3.3.29 Major Equipment Current Usage Table. The TMECUS table validates usage codes for major equipment currently in operation. Listed in Table 4-129 are elements and description associated with the Major Equipment Current Usage Table.

Table 4-128. Troop Program Sequence Number Table
(TPSN)

Data Element	Element Description
TPSN_KEY	Troop Program Sequence Number
ULC_KEY	Unit Level Code
DEFINITION	ULC Description

Table 4-129. Major Equipment Current Usage Table
(TMECUS)

Data Element	Element Description
TMECUS_KEY	Major Equipment Current Usage Code
DEFINITION	Code Definition

4.3.3.30 Equipment Plan Relation Table. The TLEAC table validates the planned relation code for equipment usage. Listed in Table 4-130 are elements and description associated with the Equipment Plan Relation Table.

Table 4-130. Equipment Plan Relation Table
(TLEAC)

Data Element	Element Description
TLEAC_KEY	Equipment Planned Relation Code
DEFINITION	Code Definition

4.3.3.31 Assigned Team Status Code Table. This table validates the code assigned to an assigned team. Table 4-131 listed the elements within the TEDY table.

Table 4-131. Assigned Team Status Code Table
(TEDY)

Data Element	Element Description
TEDY_KEY	Team Status Code
DEFINITION	Code Definition

4.3.3.32 Support Equipment Operational Status Code Table. This table contains legitimate support equipment operational codes and their definition for validation of the associated fields within the TCOMMEQ set. Table 4-132 listed the elements within the SEDY table.

Table 4-132. Assigned Team Status Code Table
(SEDY)

Data Element	Element Description
SEDY_KEY	Support Equipment Status Code
DEFINITION	Code Definition

4.3.3.33 Reason Organization Not C-1 Code Table. This table contains valid codes and associated description that most significantly describes the reason an unit is not a category 1. Table 4-133 listed the elements within the RSN table.

Table 4-133. Reason Organization Not C-1 Code Table
(RSN)

Data Element	Element Description
RSN_KEY	Reason Organization Code
DEFINITION	Code Definition

4.3.3.34 Plan Identification Number Table. This table contains valid operational planned indentification number for an unit. Table 4-134 listed the elements within the PIN table.

Table 4-134. Plan Identification Number Table (PIN)

Data Element	Element Description
PIN_KEY	Organizational Plan
	Identification Number

4.3.3.35 Major Equipment Functional Classification Code Table. The MECL table contains valid functional classification codes for major equipment. The following table identifies the element associated with Table 4-135, the MECL table.

Table 4-135. Major Equipment Functional Classification Code Table
(MECL)

Data Element	Element Description
MECL_KEY	Major Equipment Functional Classification Code
DEFINITION	Code Description

4.3.3.36 Major Equipment Capability Code Table. The MECAP table contains valid functional classification codes for major equipment. The following table identifies the element associated with Table 4-136, the MECAP table.

Table 4-136. Major Equipment Functional Classification Code Table
(MECAP)

Data Element	Element Description
MECL_KEY	Major Equipment Functional Classification Code
DEFINITION	Code Description

4.3.3.37 Overall/Measured Area Code Table. The LEVEL table contains valid overall or measured area capability codes and code descriptions. The following table identifies the element associated with Table 4-137, the LEVEL table.

Table 4-137. Overall/Measured Area Code Table
(LEVEL)

Data Element	Element Description
LEVELS_KEY	Overall/Measured Area Code
DEFINITION	Code Description

4.3.3.38 Foreign Origin Equipment Code Table. The FORDV table, Table 4-138, contains valid equipment codes and their associated definitions which originated other than the United States.

Table 4-138. Foreign Origin Equipment Code Table(FORDV)

Data Element	Element Description
FORDV_KEY	Foreign Origin Equipment Code
DEFINITION	Code Description

4.3.3.39 Flag Table. This table contains the valid 1-character code internal code. The following table identifies the elements associated with Table 4-139, the FLAG table.

Table 4-139. Flag Table (FLAG)

Data Element	Element Description
FLAG_KEY	Internal Code
DEFINITION	Code Description

4.3.3.40 BCMD Table. This table contains a three character key used for validation. The following table identifies the elements associated with Table 4-140, the BCMD table.

Table 4-140. BCMD Table (BCMD)

Data Element	Element Description
BCMD_KEY	Three-Character Key Code
BIL_BCMD	Two-Character Code associated with BCMD_Key

4.3.3.41 Major Equipment Commitment Type Code Table. The ALTYP table contains valid commitment type codes for the major equipment assigned. The following table identifies the element associated with Table 4-141, the ALTYP table.

Table 4-141. Major Equipment Commitment Type Code Table (ALTYP)

Data Element	Element Description
ALTYP_KEY	Major Equipment Commitment Type Code
DEFINITION	Code Description

4.3.3.42 Equipment Availability Code Table. The AVCAT table contains valid availability codes for all types of equipment. The following table identifies the element associated with Table 4-142, the AVCAT table.

Table 4-142. Equipment Availability Code Table (AVCAT)

Data Element	Element Description
AVCAT_KEY	Equipment Availability Code
DEFINITION	Code Description

4.3.4 Internal Processing Tables. This paragraph describes the GSORTS internal tables used for the General Interactive Query System (GIQS) and the Global SORTS Synonym table for Global Command and Control System (GCCS) user access. The MOVE, PLAD, JOPES_WORK, and UICCOM are not maintained in the SORTS database and are not listed.

4.3.4.1 Operational Counts Table. The OPLAN_CNTS table contains valid table names and table query integer values. The following table identifies the data elements associated with the Table 4-143, OPLAN_CNTS table.

Table 4-143. Operational Counts
(OPLAN_CNTS)

Data Element	Element Description
TABLE_NAME	ORACLE table being accessed
TABLE_CNT	Relationship to query being generated

4.3.4.2 GSORTS Synonyms. Table 144, the GSORTS_SYN table contains the public versions of the private ORACLE synonyms. The table allows GSORTS table access to the ORACLE GCCS user. The following table identifies the data elements associated with the GSORTS_SYN table.

Table 4-144. GSORTS Synonyms
(GSORTS_SYN)

Data Element	Element Description
SYNONYM_NAME	Public Synonym Name
TABLE_OWNER	Owner of the GCCS Table
TABLE_NAME	Name of the GCCS table or View
DB_LINK	Database link to point to other
GCCS	

4.3.4.3 Explain Plan Table. Table 4-145, the PLAN_TABLE table contains required fields used by ORACLE to display the internal query plan for the retrieval. The table allows the GIQS user to optimize query development. The table layout is provided by ORACLE. The following table identifies the data elements associated with the PLAN_TABLE table.

Table 4-145. Explain Plan Table
(PLAN_TABLE)
(Part 1 of 2)

Data Element	Element Description
STATEMENT_ID	Statement Identifier
TIMESTAMP	System Date-Time group
REMARKS	Related Remarks
OPERATION	Task being accomplished
OPTIONS	Features impacting operation
OBJECT_NODE	Node being evaluated
OBJECT_OWNER	Owner of Node being evaluated
OBJECT_INSTANCE	ORACLE Instance in operation
OBJECT_TYPE	Type being evaluated (i.e. TABLE)
OPTIMIZER	Optimization being used
SEARCH_COLUMNS	Parameters for the Search
ID	Identifier
PARENT_ID	Owner of the process
POSITION	Starting Position
OTHER	Additional query factors

4.3.4.4 Fras Unit Type Code Table. Table 4-146, the FUTC table contains required fields used by ORACLE. The following table identifies the data elements associated with the FUTC table.

Table 4-146. Fras Unit Type Code Table
(FUTC)

Data Element	Element Description
FUTC_KEY	Fras Unit Type Code
FUTC_TITLE	Fras Unit Type Name

4.3.4.5 Temporary Table. Table 4-147, the TEMP table contains required fields used to support the Hiearch SQLForm Query. The following table identifies the data elements associated with the TEMP table.

Table 4-147. Temporary Table
(TEMP)

Data Element	Element Description
OPCON	Operational Command
OPNAME	Operational Command Name
UICNAME	Unit Name
UIC	Unit Identification Code

SECTION 5. REQUIREMENTS CROSS REFERENCE

The requirements cross reference is provided for in the SORTS Modernization System Design Document.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 6. ABBREVIATIONS AND ACRONYMS

ASORTS	Army Status of Resources and Training System
AWIS	Army WWMCCS Information System
CINC	Commander of Combatant Command
CJCS	Chairman, Joint Chiefs of Staff
DBA	Database Administrator
DISA	Defense Information Systems Agency
DOD	Department of Defense
DS	Database Specification
DSSO	Defense Systems Support Organization
FD	Functional Description
FIPS Pub	Federal Information Processing Standards Publication
FORSCOM	U.S. Army Forces Command
GCINC	Geographic CINC
GEOFILE	Geographic Location File
GIQS	General Interactive Query System
IEEE	The Institute of Electrical and Electronics Engineering, Inc.
ISO	International Standards Organization
JAMES	Joint Automated Message Editing System
JDSSC	Joint Data Systems Support Center (former name of DSSO)
JNCR	Resource Monitoring Branch
JOPES	Joint Operations Planning and Execution System
JRS	Joint Reporting Structure
JS	Joint Staff
JVIDS	Joint Visual Information Display System
MEQPT	Major Equipment Code File
MOP	Memorandum of Policy
MTF	Message Text Format
NCA	National Command Authorities
NMCC	National Military Command Center
NMCS	National Military Command System
OPLAN	Operation Plan
OSI	Open Systems Interconnection

POSIX	Portable Operating System Definition
RDBMS	Relational Database Management System
RO/RO	Roll-On/Roll-Off
SDR	System Design Review
SORTS	Status of Resources and Training System
SQL	Structured Query Language
SRR	System Requirements Review
SSS	System/Segment Specification
TDA	Table of Distribution and Allowances
TR	Technical Report
TUCHA	Type Unit Characteristics
UIC	Unit Identification Code
USMTF	United States Message Text Formatting
